The Department of Finance Canada announced today that Canada's official international reserves decreased by an amount equivalent to US\$525 million in February to US\$128,130 million. This was driven by negative reserves management operations (US\$1,054 million)¹, which were slightly offset by a net gain on investments (US\$529 million)².

Details on the level and composition of Canada's reserves as of February 27, 2026, as well as the major factors underlying the change in reserves, are provided below. All figures are in millions of US dollars unless otherwise noted.

Notes:

1. Net change in securities and deposits resulting from foreign currency funding activities of the government. Foreign reserves are managed under an asset-liability matching framework. Therefore, when a foreign currency liability matures, assets are used to repay the principal, leading to a decrease in reserves. In February 2026, Canada bills decreased by US\$1,235 million to a level of outstanding bills of US\$1,608 million. An equivalent of US\$400 million in cross-currency swaps was raised during the month while US\$219 million in cross-currency swaps matured during the month.
 2. Net investment gains and losses include return on investments, foreign currency debt charges and revaluation effects.
 3. "Other reserve assets" include the distribution of SDRs allocated to Canada by the IMF as part of the IMF Resilience and Sustainability Trust borrowing agreement.
 4. "Return on investments" comprises US\$390 million of interest earned on investments and a US\$807 million decrease in the market value of securities.
 5. "Revaluation effects" reflect changes in the market value of reserve assets resulting from movements in exchange rates. In February 2026, the revaluation effect was mainly due to the depreciation of the euro, the yen, and the pound sterling.
 6. "Net government operations" are the net purchases of foreign currency for government foreign exchange requirements and for additions to reserves.
 7. "Foreign currency securities" include maturities of foreign currency debt, cross-currency swap payments and an estimate of interest payments on foreign currency liabilities.
 8. "Pledged assets" are securities posted as collateral to cover unsettled transactions and are included in total reserves.
 9. "Securities lent under repurchase agreements" are included in total reserves. Collateral provided in securities lending transactions is not included in total reserves.
 10. Cash invested under repurchase agreements is included in total reserves. Collateral provided in securities lending transactions is not included in total reserves.
