RADIO EQUIPMENT LIST

NOMENCLATURE DU MATÉRIEL RADIO

TYPE APPROVED
AND
TECHNICALLY ACCEPTABLE
EQUIPMENT

MATÉRIEL HOMOLOGUÉ
ET
TECHNIQUEMENT ACCEPTABLE

Canada

FOREWORD

The Radio Equipment List is a Department of Communications publication, listing radio equipment which has been certified as type-approved or technically acceptable for use in Canada.

Certification of radio equipment means that the equipment complies with technical standards or specifications. A license to operate the equipment, where applicable, is issued separately and is granted solely on the basis of the existing radio environment, type of service and location of operation.

The REL is completely up-dated and re-issued four times per year. Advisory notices of interim changes are issued on a weekly basis to departmental offices across Canada.

Available in Canada through Associated Bookstores and other booksellers or by mail from:
Canada Communication Group - Publishing,
Ottawa, Ontario, Canada K1A 0S9

Price Canada: Volume: \$30.00
Annual Subscription: \$115.00

Other Countries: Volume: \$36.00
Annual Subscription: \$138.00

Catalogue No.: C023-2
ISSN: 0707-3755

AVANT-PROPOS

La Nomenclature du matériel radio est une publication du ministère des Communications qui donne la liste du matériel radio pour lequel un certificat d'homologation ou d'acceptabilité technique a été délivré pour utilisation au Canada.

La certification du matériel radioélectrique signifie que ce matériel répond aux exigences des normes techniques ou des cahiers des charges applicables. S'il y a lieu de le faire, une licence en vue de l'utilisation de matériel certifié est délivrée séparément et accordée seulement après étude du milieu radioélectrique ambiant, du genre de service radio existant et de l'emplacement de la station.

Ce document est entièrement mis à jour et réédité quatre fois par année. Des avis indiquant les modifications provisoires sont publiés une fois par semaine et distribués aux bureaux du Ministère à l'échelle du pays.

INTRODUCTION

Part A of the Radio Equipment List includes all radio equipment which has been granted type-approval or provisional type-approval under a specific Radio Standards Specification.

Type-approved equipment may have a frequency range listing beyond the frequency range of the Specification under which it was type-approved. Such equipment is considered technically acceptable over the frequency range so listed. This does not mean that stations proposing the use of such equipment will be licensed automatically for the service or services indicated, upon receipt of an application for license to use radio. It means only that, from a technical point of view, the listed equipment is capable of performing in a satisfactory manner.

This part has been divided into sections according to the specification under which the equipment was granted type-approval. These sections are as follows:

- A-8 Land and Mobile Station AM and FM Radiotelephone Equipment Type-Approved Under Radio Standards Specification 136.
- A-10 Land and Coast Station AM Transmitters Type-Approved Under Radio Standards Specification 117.
- A-11 Land and Mobile Station Cellular Radio Telephone Transmitters Type Approved Under Radio Standards Specification 118.
- A-13 Television Broadcasting Transmitting Equipment Type-Approved Under Radio Standards Specification 154.
- A-14 Emergency Radio Beacon Transmitters Type-Approved Under Radio Standards Specification 147.
- A-16 Land and Mobile Station AM Radiotelephone Transmitters and Receivers Type-Approved Under Radio Standards Specification 140.
- A-17 Land Station AM Broadcasting Transmitters Type-Approved Under Radio Standards Specification 150

INTRODUCTION

La partie A de la Nomenclature du matériel radio comprend tout le matériel radioélectrique qui a fait l'objet d'une homologation définitive ou provisoire, en conformité d'un Cahier des charges sur les normes radioélectriques.

Il se peut que la gamme de fréquences indiquées pour le matériel homologué dépasse celle qui est prescrite par le cahier des charges en vertu duquel l'homologation a été effectuée. Ce matériel est jugé techniquement acceptable même s'il dépasse la gamme de fréquences indiquées dans le cahier des charges visé. Cela ne signifie pas cependant, qu'une licence sera automatiquement délivrée, sur réception d'une demande, aux stations des services indiqués, qui projettent d'utiliser ce matériel, mais plutôt que le matériel en question peut fonctionner de façon satisfaisante du point de vue technique.

Elle est divisée en sections, suivant la classe de matériel et/ou du Cahier des charges en conformité duquel le matériel a été homologué. Ces sections sont les suivantes:

- A-8 Matériel radiotéléphonique AM et FM de station terrestre et de station mobile, homologué en conformité du Cahier des charges no 136 sur les normes radioélectriques.
- A-10 Émetteurs AM de station terrestre et de station côtière, homologué en conformité du Cahier des charges no 117 sur les normes radioélectriques.
- A-11 Émetteurs et récepteurs radiotéléphoniques de station terrestre et de station mobile homologués en conformité du cahier des charges no 118.
- A-13 Matériel émetteur de télévision de radiodiffusion, homologués en conformité du Cahier des charges no 154 sur les normes radioélectriques.
- A-14 Balises de détresse homologuées en conformité du Cahier des charges no 147 sur les normes radioélectriques.
- A-16 Émetteurs et récepteurs radioélectriques AM de station terrestre et de station mobile, homologués en conformité du Cahier des charges no 140 sur les normes radioélectriques.
- A-17 Émetteurs de radiodiffusion AM de station terrestre, homologué en conformité du Cahier des charges no 150 sur les normes radioélectriques.

- A-19 Land Station Frequency Modulated Broadcasting Transmitters Type-Approved Under Radio Standards Specification 153 (Including Translators).
- A-20 Land and mobile FM or PM radiotelephone transmitters and receivers type approved under Radio Standards Specification Number 122 Issue 1.
- A-21 Mobile Station AM and FM Radiotelephone Transmitters and Receivers Type-Approved Under Radio Standards Specification 120.
- A-22 Low Power Land and Mobile Station Single Sideband Transmitters Type-Approved Under Radio Standards Specification 180.
- A-23 Coast and Ship Station Single Sideband Sideband Transmitters and Receivers Type-Approved Under Radio Standards Specification 181.
- A-24 Coast and Ship Station FM or PM Transmitters and Receivers Type-Approved Under Radio Standards Specification 182.
- A-26 Mobile Station FM or PM Radiotelephone Transreceivers Type-Approved Under Radio Standards Specification 121.
- A-28 Low-Power Wireless Microphones and Telemetering Devices Type-Approved Under Radio Standards Specification 214.
- A-29 Land and Mobile Stations AM Single Sideband Radiotelephone Transmitters Type-Approved Under Radio Standards Specification 125
- A-30 Radio Paging Receivers Type-Approved Under Radio Standard Specification 201.
- A-31 Land and Mobile Stations Non Multiplexed Voice Modulated FM or PM Radiotelephone Transmitters and Receivers Type-Approved Under Radio Standards Specification 119.

- A-19 Émetteurs de radiodiffusion FM de station terrestre, homologués en conformité du Cahier des charges no 153 sur les normes radioélectriques (Traducteurs sont inclus)
- A-20 Émetteurs et récepteurs radioélectriques FM et PM de station terrestre et de station mobile, homologués en conformité du Cahier des charges no. 122 sur les normes radioélectriques.
- A-21 Émetteurs de radiodiffusion radiotéléphoniques AM et FM de station mobile, homologués en conformité du Cahier des charges no 120 sur les normes radioélectriques.
- A-22 Émetteurs-récepteurs à bande latérale unique de station terrestre et de station mobile à faible puissance, homologués en conformité du Cahier des charges no 180 sur les normes radioélectriques.
- A-23 Émetteurs et récepteurs à bande latérale unique de station côtière et de station de navire, homologués en conformité du Cahier des charges no 181 sur les normes radioélectriques.
- A-24 Émetteurs et récepteurs FM et PM de station côtière et de station de navire, homologués en conformité du Cahier des charges no 182 sur les normes radioélectriques.
- A-26 Émetteurs-récepteurs radiotéléphoniques FM et PM, homologués en conformité du Cahier des charges no 121 sur les normes radioélectriques.
- A-28 Microphones sans fil et dispositifs de télémétre à faible puissance, homologués en conformité du Cahier des charges no 214 sur les normes radioélectriques.
- A-29 Émetteurs radiotéléphoniques AM à bande latérale unique de station terrestre et de station mobile, homologués en conformité du Cahier des charges no 125 sur les normes radioélectriques.
- A-30 Récepteurs de téléappel, homologués en conformité du Cahier des charges no 201 sur les normes radioélectriques.
- A-31 Émetteurs et récepteurs radiotéléphoniques FM ou PM non multiplexe de station terrestre et de station mobile, homologués en conformité du Cahier des charges no 119 sur les normes radioélectriques.

A-35 Low Power Cordless Telephones Operating in the 46 MHz and 49 MHz Bands Type-Approved Under Radio Standards Specification 209.

A-36 Marine Emergency Position Indicating Radio Beacon (EPIRB) Transmitters Operating on 121.5 MHz, 243 MHz or 406.025 MHz Type-Approved under Radio Standards Specification 187.

PART B

Part B of the Radio Equipment List includes radio equipment which has not been type-approved under a specific Radio Standards Specification but which has been declared technically acceptable for use in Canada in accordance with Radio Standards Procedure 100. The Equipment so listed will normally be technically acceptable until the appropriate Radio Standards Specification becomes effective, after which the equipment may be deleted from the Radio Equipment List.

The technical acceptability of radio equipment for use in Canada does not necessarily mean that stations proposing the use of such equipment will be licensed automatically for the service or services indicated, upon receipt of an application for licence to use radio. It means only that, from a technical point of view, the listed equipment is capable of performing in a satisfactory manner. From time to time the Department may request additional data to prove that the proposed equipment can satisfactorily provide a specific service or can operate satisfactorily under specific conditions.

PART C

Part C of the Radio Equipment List contains certain low power radio equipment for use in special applications and for which a specification is not available. This equipment has been declared technically acceptable for use in Canada in accordance with Radio Standards Procedure 100.

PART D

Part D of the Radio Equipment List contains low power remote control equipment for models, declared technically acceptable in accordance with Radio Standards Procedure 100. Equipment included in this Part of the Radio Equipment List must be capable of operating in the 27 MHz or 72 MHz Industrial Scientific and Medical Bands. The R.F. Power Output is limited to 5 watts in the 27 MHz band and 1 watt in the 72 MHz band.

A-35 Téléphones sans cordon de faible puissance fonctionnant dans les bandes de 46 MHz et de 49 MHz, homologuées en conformité du cahier des charges no 209 sur les normes radioélectriques.

A-36 Radiobalises de Localisation des Sinistres (RLS) Maritimes Fonctionnant sur 121.5 MHz, 243 MHz, ou 406.025 MHz, homologuées en conformité du Cahier des Charges No 187 sur les Normes Radioélectriques.

PARTIE B

La partie B de la Nomenclature comprend le matériel radio qui n'a pas été homologué en conformité d'un Cahier des charges sur les normes radioélectriques mais qui a été déclaré techniquement acceptable pour emploi au Canada, en conformité de la Procédure no 100 sur les normes radioélectriques. Le matériel inscrit dans cette partie sera normalement techniquement acceptable jusqu'à ce que le Cahier des charges approprié devienne en vigueur, après quoi ce matériel pourra être rayé de la Nomenclature.

L'acceptabilité technique de matériel radio pour emploi au Canada ne veut pas nécessairement dire que les stations qui en projettent l'emploi se verront automatiquement délivrer une licence autorisant le service ou les services mentionnés, dès que le Ministère recevra une demande de licence d'exploitation d'une station radio. Elle signifie seulement que, du point de vue technique, le matériel inscrit dans la Nomenclature peut fonctionner de manière satisfaisante. À l'occasion, le Ministère peut demander des données supplémentaires démontrant que le matériel dont l'emploi est projeté peut assurer de façon satisfaisante un service déterminé ou peut fonctionner de façon satisfaisante dans les conditions données.

PARTIE C

La partie C de la Nomenclature comprend du matériel radio à faible puissance pour applications spéciales et pour lequel il n'existe pas de Cahier des charges. Ce matériel a été déclaré techniquement acceptable pour emploi au Canada en conformité de la Procédure no 100 sur les normes radioélectriques.

PARTIE D

La partie D de la Nomenclature comprend le matériel de télécommande de modèles réduits à faible puissance qui a été déclaré techniquement acceptable en conformité de la Procédure no 100 sur les normes radioélectriques. Le matériel inscrit dans cette partie de la Nomenclature doit pouvoir fonctionner dans la bande industrielle, scientifique et médicale de 27 ou de 72 MHz. La puissance de sortie HF est limitée à 5 watts dans la bande de 27 MHz et à 1 watt dans la bande de 72 MHz.

PART E

Part E of the Radio Equipment List includes radio equipment which has been declared technically acceptable for use in Canada in the Broadcast Service, in accordance with Radio Standards Procedure 100.

PART F

Part F of the Radio Equipment List includes radio equipment which has been declared technically acceptable for use in Canada in accordance with Radio Standards Procedure 101. The class of equipment may be used in single or multiple hop radio links operating on frequencies between 30 MHz and 30 GHz.

The listing of this equipment as technically acceptable does not necessarily mean that stations proposing the use of this equipment will be licensed automatically for the service or services indicated, upon receipt of an application for licence to use radio. It means only that, from a technical point of view, the listed equipment is capable of performing in a satisfactory manner. Each system proposing the use of such equipment must be approved on its own merits before a licence may be granted.

PART K

Includes radio equipment which has been declared technically acceptable for exemption from licensing in Canada in accordance with the provisions of Radio Standards Procedure 100, in those cases where no specific Radio Standards Specification exists.

PART L

Part L of the Radio Equipment List includes radio equipment which has been declared technically acceptable for use in Canada in accordance with Telecommunications Regulation Circular TRC-74.

EXPLANATION OF COLUMN HEADINGS

1. Model or Type Number - This is the model or type number assigned to the equipment by the manufacturer for identification purposes.
2. Transmitter, Receiver, Combination - This is the particular piece of equipment to which the model number refers, that is, transmitter (A), receiver (B), or combination (A & B). Where more than one sub unit of equipment is required to make up a given receiver or transmitter, all of the model numbers involved are grouped together as one model number. The individual model numbers of the sub units are separated by an oblique stroke. For example XXX/XX/XXXXX.

PARTIE E

La partie E de la Nomenclature comprend le matériel radio qui a été déclaré techniquement acceptable pour emploi au Canada dans le service de la radiodiffusion, en conformité de la Procédure no 100 sur les normes radioélectriques.

PARTIE F

La partie F de la Nomenclature comprend le matériel radio qui a été déclaré techniquement acceptable pour emploi au Canada en conformité de la Procédure no 101 sur les normes radioélectriques. Le matériel de cette classe peut être utilisé pour les liaisons hertziennes en un seul ou en plusieurs bonds entre 30 MHz et 30 GHz.

L'acceptabilité du matériel radio inscrit dans cette partie ne veut pas dire que les stations qui en projettent l'emploi se verront automatiquement délivrer une licence autorisant le service ou les services mentionnés, dès que le Ministère recevra une demande de licence d'exploitation de station radio. Elle signifie seulement que, du point de vue technique, le matériel inscrit dans la Nomenclature peut fonctionner de façon satisfaisante. Chaque système fondé sur l'emploi de ce matériel devra être approuvé selon ses propres caractéristiques avant de faire l'objet d'une licence.

PARTIE K

Comprend le matériel radioélectrique qui a été désigné comme étant techniquement acceptable et qui peut être exempté de la licence au Canada, conformément aux dispositions de la Procédure no 100 sur les normes radioélectriques, dans les cas pour lesquels il n'existe aucun Cahier des charges sur les normes radioélectriques.

PARTIE L

La partie L de la Nomenclature comprend le matériel radio qui a été déclaré techniquement acceptable pour emploi au Canada en conformité de la Circulaire de la Réglementation des Télécommunications CRT-74.

EXPLICATION DES EN-TÊTES DE COLONNE

1. No. mod ou type - Numéro de modèle ou de type attribué au matériel par le fabricant aux fins d'identification.
2. Em. Rec. Comb. - Il s'agit de l'appareil auquel a trait le numéro de modèle, c'est-à-dire: émetteur (A), récepteur (B), émetteur et récepteur combinés (A & B). Dans le cas où il faut utiliser plus d'un sous-élément de matériel pour composer un récepteur ou un émetteur particulier, tous les numéros de modèle des divers composants sont groupés pour n'en former qu'un seul et ils sont séparés par une oblique (par exemple: XXX/XX/XXXXX).

Note: Radio frequency power amplifiers are only approved with an associated exciter and are listed only as combined units.

3. Type-approval Number - This is the type-approval number assigned to each piece of equipment which has been granted type-approval under a Specific Radio Standards Specification. Type-approval numbers are not assigned to equipment included in Parts B, C, D, E, F, K and L of the Radio Equipment List.

In part A of the Radio Equipment List, the type approval number consists of at least nine digits. The first three digits are the company code number, assigned to each manufacturer or distributor of radio equipment. The fourth and fifth digits are the last two figures of the number of the Radio Standards Specification under which the type-approval number was granted and the sixth digit is the current issue number of that specification. The last three digits of the type approval number indicates the number of type-approvals granted under this Specification and are assigned in numerical order.

For example, in Part A-8, the type-approval number 101365081 will be found. The first three digits (101) indicates the company code number. The figures 36 indicates Radio Standards Specification 136, the figure 5 indicates Issue 5 and the last three digits, 081, indicates that this is the 81st type-approval granted under this issue of the Radio Standards Specification.

Please note that some company code numbers now have four digits.

In some cases one suffix letter is used as provided for under certain specifications.

Also, the suffix letter X is used to indicate equipment transferred from Parts A-7 (RSS 126), A-15 (RSS 139) and A-20 (RSS 105) to Part A-31 (RSS 119) as provided for under TRC-44.

The suffix P is used for provisionally type-approved equipment listed in Part A-13 under RSS 154.

An asterisk, prefixing a type-approval number, indicates a new or amended entry.

4. Certification number and Class - This column denotes the certification number and class of equipment or type of service for which the equipment is approved.

Remarque: Les amplificateurs de puissance RF ne sont approuvés que s'ils sont utilisés avec un excitateur connexe et qu'ils ne sont inscrits qu'en tant que dispositifs combinés.

3. No. d'hom. - Numéro d'homologation qui est attribué à chaque appareil qui a fait l'objet d'une homologation, en conformité d'un Cahier des charges sur les normes radioélectriques. On n'a pas attribué de numéros d'homologation au matériel compris dans les parties B, C, D, E, F, K, et L de la Nomenclature du matériel radio.

Dans la partie A de la Nomenclature, le numéro d'homologation comprend au moins neuf chiffres. Les trois premiers chiffres représentent le code de compagnie, attribué à chaque fabricant ou concessionnaire de matériel radio. Le quatrième et le cinquième chiffres représentent les deux derniers chiffres du numéro du Cahier des charges sur les normes radioélectriques en vertu duquel l'homologation a été accordée et le sixième chiffre représente le numéro de l'édition courante de ce Cahier des charges. Les trois derniers chiffres du numéro d'homologation représentent le nombre d'homologation accordées par ordre numérique.

Par exemple, dans la partie A-8, on peut trouver le numéro d'homologation 101365081. Les trois premiers chiffres (101) représentent le numéro de code de compagnie. Le nombre 36 indique le Cahier des charges no 136 sur les normes radioélectriques, le chiffre 5 représente la 5e édition et les trois derniers chiffres, 081, indiquent qu'il s'agit de la 81ème homologation accordée en conformité de ladite édition du Cahier des charges en question.

Veuillez prendre note que certaines compagnies ont maintenant un code de compagnie de quatre chiffres.

Dans certains cas, une lettre placée en suffixe est utilisée conformément à certaines spécifications. De plus, le suffixe X est utilisé pour indiquer le matériel qui a été transféré des Parties A-7 (CNR 126), A-15 (CNR 139) et A-20 (CNR 105) à la Partie A-31 (CNR 119) conformément à la CRT-44.

Le suffixe P est utilisé pour indiquer le matériel homologué de façon provisoire figurant dans la Partie A-13 du CNR n 154.

Un astérisque placé devant le numéro d'homologation désigne une nouvelle entrée ou une entrée modifiée.

4. No. de cert. et classe - Cette colonne donne le numéro du certificat et la classe de matériel ou le genre de service pour lequel le matériel est homologué.

For equipment listed in Parts B, C, D, E, F, K and L of the Radio Equipment List, where type-approvals are not granted under a specific Radio Standards Specification, the class is indicated by a code group consisting of not more than three digits, a maximum of one from each of the following tables.

Table I - Type of Equipment

1. Aircraft Station Equipment
2. Land Station Equipment
3. Ship Station Equipment
4. Broadcast Station Equipment
5. Power Line Carrier Equipment
6. Mobile Station Equipment
7. Miscellaneous Equipment
8. Coast Station Equipment
9. Secondary Ship-Board Equipment

Table II - Type of Emission

1. Continuous Wave
2. Amplitude Modulation
3. Pulse Modulation
4. Single Sideband (Compatible) (3A3H)
5. Wideband Frequency Modulation
6. Narrow Band Frequency Modulation
7. Television
8. Single Sideband. (Suppressed Carrier) (3A3J)
9. Multi Mode Receivers

Table III - Band of Frequencies

1. Very Low Frequency (3-30 kHz) and Low Frequency (30-300 kHz)
2. Medium Frequency (300-3000 kHz)
3. High Frequency (3-30 MHz)
4. Very High Frequency (30-300 MHz)
5. Ultra High Frequency (300-3000MHz)
6. Super High Frequency (3-30 GHz) (3000-30,000 MHz)
7. EHF (30-300 GHz)
8. Multi-band Receivers

Note - Airborne VHF equipment under Class 124, technically-accepted before May 19, 1978, are further graded according to the channel spacing capabilities of the equipment as follows:

124A. Class I airborne VHF communications equipment capable of operating at 50 Khz. Channel spacing and intended for use in all civil aircraft with a gross weight of 12,400 pounds or over, intended for the carriage of passengers, cargo or mail, for remuneration or hire.

124B. Class II airborne VHF communications equipment

Dans le cas du matériel inscrit dans les parties B, C, D, E, F, K et L de la Nomenclature, et qui n'est pas homologué en vertu d'un Cahier des charges sur les normes radioélectriques en particulier, la classe est indiquée par un groupe de codes qui consiste en trois chiffres au plus, soit un seul chiffre tiré de chacun des tableaux suivants.

Tableau I - Type de matériel

1. Matériel de station d'aéronef
2. Matériel de station terrestre
3. Matériel de station de navire
4. Matériel de station de radiodiffusion
5. Matériel à onde porteuse sur secteur
6. Matériel de station mobile
7. Matériel divers
8. Matériel des station côtière
9. Matériel auxiliaire à bord des navires.

Tableau II - Type d'émission

1. Ondes entretenues
2. Modulation d'amplitude
3. Modulation par impulsions
4. Bande latérale unique (compatible) (3A3H)
5. Modulation de fréquence à large bande
6. Modulation de fréquence à bande étroite
7. Télévision
8. Bande latérale unique (porteuse supprimée) (3A3J)
9. Récepteurs à modes multiples.

Tableau III - Bande de fréquences

1. Très basses fréquences (3-30 kHz) et basses fréquences (30-300 kHz)
2. Fréquences moyennes (300-3000 kHz)
3. Haute fréquences (3-30 MHz)
4. Très hautes fréquences (30-300 MHz)
5. Ultra-hautes fréquences (300-3000MHz)
6. Fréquences supérieures (3-30 GHz) (3000-30,000 MHz)
7. EHF (30-300 GHz)
8. Récepteurs à plusieurs bandes.

Remarques - Le matériel VHF aéroporté de la classe 124, jugé techniquement acceptable avant le 19 mai 1978, est en outre subdivisé selon ses possibilités d'espace-ment entre les voies, ainsi qu'il suit:

124A. Le matériel de trafic VHF aéroporté de la classe I pouvant fonctionner avec un espacement entre les voies de 50 KHz et destiné à être utilisé à bord de tous les aéronefs civils dont le poids brut est de 12400 livres ou plus et qui sont destinées au transport des passagers, des marchandises ou du courrier moyennant un prix de louage ou une rémunération.

capable of 50 KHz. Channel spacing and intended for use in all civil aircraft not specified above.

124C. Class III airborne VHF communications equipment not capable of operating at 50 kc/s channel spacing.

124D. All airborne VHF navigation equipment.

The bandwidth of aeronautical VHF communications equipment are identified beginning with Issue 13, July 1980, of this list. These are identified with the following codes:

9. 100 kHz channel spacing
8. 50 kHz channel spacing
7. 25 kHz channel spacing

For Category 7 of Table I the following general classification will be used:

Miscellaneous Equipment

1. Direction Finding Equipment
2. Traffic Control and Measuring Equipment
3. Low Power Devices for Control and Security Application
4. Radar
5. Low Power Remote Control
6. Monitor Receivers (Those which are not part of a system)
7. Paging Equipment
8. Wireless Microphones, TX'S & RX'S
9. Medical Telemetry
10. Distance Measuring Equipment
11. Industrial Telemetry
12. Theft-Alert System
13. Movement Detection Device
14. Low-Power Transmitter (535-1605 kHz)
15. Wireless Headphone Systems
16. Land Mobile Equipment with Speech Scrambling Capability
17. Land Mobile Equipment with Data Transmission Capability
18. Land Mobile Equipment with Data Transmission Capability Only
19. Security and Alarm Monitoring Equipment
20. Wireless Intercom
21. Low Power Transceiver (49 MHz)
22. Cordless Telephones 46 & 49 MHz Band. Output: Watts
23. Fixed, Land Mobile or Maritime radio transmitters utilizing frequency synthesis techniques for generation of desired frequencies which are selectable by the operator. Reference TRC-64

124B. Le matériel de trafic VHF aéroporté de la classe II pouvant fonctionner avec un espacement entre les voies de 50 KHz et destiné à être utilisé à bord de tous les aéronefs civils qui ne sont pas mentionnés ci-dessus.

124C. Le matériel de trafic VHF aéroporté de la classe III qui ne peut pas fonctionner avec un espacement entre les voies de 50 KHz.

124D. Tout le matériel VHF de navigation aéroporté.

L'espacement entre les voies d'équipement de communications aéronautiques VHF a été identifié pour la première fois dans l'édition no 13, juillet 1980, de cette liste. Ces espacements sont identifiés par les codes suivants:

9. Espacement de 100 kHz
8. Espacement de 50 kHz
7. Espacement de 25 kHz

Pour la catégorie 7 du Tableau I, on a utilisé la classification générale suivante:

Matériel divers

1. Matériel radiogoniométrique
2. Matériel de contrôle de la circulation et de mesure
3. Dispositifs de faible puissance utilisés à des fins de commande et de sécurité
4. Radar
5. Télécommande à faible puissance.
6. Récepteurs de contrôle (ceux qui ne font pas partie d'un système)
7. Matériel de téléappel
8. Microphones sans fil, TX's & RX's
9. Télémétrie médicale
10. Matériel de télémétrie
11. Télémessure industrielle
12. Alarme anti-vol
13. Dispositif détecteur de mouvements
15. Casques d'écoute sans fil
16. Matériel du service mobile terrestre muni d'un dispositif de brouillage de la conversation
17. Matériel du service mobile permettant la transmission de données
18. Matériel du service mobile permettant la transmission de données seulement
19. Matériel de contrôle de la sécurité et d'alarme
20. Interphone sans fil
21. Émetteurs/récepteurs à faible puissance (49 MHz)
22. Téléphones sans cordon. La bande 46 et 49 MHz; La puissance de sortie en watts.

Paragraph 5.

24. Low Power Equipment for the Handicapped.
 25. Low Power TV audio to FM Rebroadcasting Equipment certified under RSP 100 and RSS 214.
 26. Cordless telephones. 49.670MHz - 49.970MHz and 72.02MHz - 72.98MHz or 74.62MHz - 74.78MHz or 75.22MHz - 75.98MHz. 1 WATT maximum R.F. output. Technical acceptability certification RSP 100 (RSS 120).
 27. INMARSAT Equipment.
 28. Low Power Announce System
 29. Receiver Controllers
 30. LORAN-C Equipment
 31. Marine Telemetry Surveying Equipment
 32. EPIRBS & EPIBS
 33. Global Positioning System (GPS Equipment)
 34. Spread Spectrum Equipment (TRC -76)
 35. Low Power TV (GL-27)
5. Bandwidth & Type of Emission - The necessary bandwidth and type of emission is indicated as shown by the International Telecommunications Union. However, in the case of radio relay equipment, where the necessary bandwidth may vary with the number of circuits in each particular case, the type of emission only has been shown. This column is not used in Part G of the Radio Equipment List.
 6. Power - The R.F. power output is indicated in watts. For equipment listed in all parts of the Radio Equipment List, the power indicated will be the manufacturers rated power. In case of equipment under Part A, the rated power output shall be within the limits specified in the Radio Standards Specification under which the equipment is type-approved. For single Sideband A2J and A3J modes, the power is expressed as peak envelope power (PEP), for A2H and A3H modes the power is expressed as carrier power (one quarter of the Peak Envelope Power referred to above).
 7. Frequency Range - This is the range of frequencies over which the equipment is designed to operate and shows the low and high limits respectively. Where only one frequency is indicated, it is assumed that particular equipment was designed to operate on a specific frequency. The frequencies are indicated as kHz (kilohertz), MHz (megahertz) and GHz (gigahertz).

The names of certificate holders are found immediately preceding groups of equipment. The certificate holders name is followed by the company code number. Where another firm takes over the responsibility for a group of approvals due

23. Les Émetteurs radio employés dans le service fixe, le service mobile terrestre et le service mobile maritime qui utilisent des techniques de synthèse pour produire les fréquences voulues et réglables par l'opérateur. Référence CRT-64 Paragraphe 5.
 24. Équipement à faible puissance pour les handicapés.
 25. Appareils à faible puissance de réémission audio TV à FM homologués en conformité avec PNR 100 et CNR 214
 26. Téléphones sans cordon. 49.670 MHz - 49.970 MHz et 72.02 - 72.98 MHz ou 74.62 - 74.78 MHz ou 75.22 MHz - 75.98 MHz. Puissance maximale de sortie 1 WATT. Certification d'acceptabilité technique PNR 100 (CNR 120).
 27. Équipement INMARSAT
 28. Système de mini-diffusion d'annonces
 29. Récepteurs utilisés à des fins de commande
 30. Équipement LORAN-C
 31. Matériel de télémessure de relevé maritime
 32. EPIRBS et EPIBS
 33. Système d'orientation global (équipement GPS)
 34. Matériel à étalement spectral (CRT-76)
 35. TV à faible puissance (LD-27)
5. Larg. de b. et m. (Largeur de bande et type d'émission). La largeur de bande nécessaire et le type d'émission sont donnés suivant la méthode adoptée par l'Union internationale des télécommunications. Toutefois, en ce qui concerne le matériel de relais radio-électriques, dont la largeur de bande nécessaire peut varier avec le nombre de circuits dans chaque cas particulier, on n'a indiqué que le type d'émission. Cette colonne ne figure pas dans la partie G de la Nomenclature.
 6. Puiss. - La puissance de sortie HF est indiquée en watts. Dans le cas du matériel inscrit dans toutes les parties de la Nomenclature, la puissance mentionnée est la puissance nominale donnée par le fabricant. Dans le cas du matériel inscrit dans la partie A, la puissance nominale de sortie se situe dans les limites indiquées dans le Cahier des charges sur les normes radioélectriques d'après lequel le matériel est homologué. En ce qui concerne les mode A2J et A3J bande latérale unique, la puissance est exprimée en tant que puissance d'enveloppe de crête, pour les modes A2H et A3H, la puissance est exprimée en tant que puissance porteuse (un quart de la puissance d'enveloppe de crête susmentionnée).
 7. Gamme de fréq. - Il s'agit de la gamme de fréquences dans laquelle le matériel peut fonctionner; les limites inférieure et supérieure sont données. Lorsqu'une seule fréquence est indiquée, l'appareil est censé fonctionner sur une fréquence déterminée. Les fréquences sont données en kilohertz (kHz), en mégahertz (MHz) et en gigahertz (GHz).

to reasons such as company mergers, bankruptcies etc., the company code for the new company is given in brackets. The company name may be included also, space permitting.

REFERENCE LIST OF COMPANY NAMES

The following list is in two cross referenced sections and is included to assist in the location of equipment in each part of the book.

Section 1. Alphabetical List of Certificate Holders

2. Numerical List of Certificate Holders

Les noms des détenteurs de certificats sont inscrits immédiatement avant les groupes d'équipements et suivis du numéro de code de compagnie. Dans le cas où une société en remplace une autre à titre de responsable d'un groupe d'approbations, pour des motifs tels qu'une fusion, une faillite, etc., le code de compagnie de la nouvelle société est indiqué entre parenthèses. Le nom de la compagnie peut aussi être mentionné, si l'espace le permet.

NOMENCLATURE DE RÉFÉRENCE DES NOMS DE COMPAGNIE

La nomenclature ci-dessous comprend deux sections de renvois; elle a pour but d'aider le lecteur à trouver dans quelle partie de la nomenclature du matériel radio se trouvent les listes de matériel.

Section 1. Par ordre alphabétique de détenteurs de certificats

2. Par ordre numérique de détenteurs de certificats.
