# RADIO EQUIPMENT LIST

## TYPE APPROVED AND TECHNICALLY ACCEPTABLE EQUIPMENT

# NOMENCLATURE DU MATÉRIEL RADIO

## MATÉRIEL HOMOLOGUÉ ET TECHNIQUEMENT ACCEPTABLE

Canada

## FOREWORD

The Radio Equipment List (REL) is a Department of Communications publication, listing radio equipment which has been certified for use in Canada.

Certification of radio equipment means that the equipment complies with established Radio Standards Specifications, or general technical requirements, in accordance with Radio Standards Procedure 100. A certificate of Type Approval or of Technical Acceptability is issued accordingly. A licence to operate the equipment, where applicable, is required separately and is granted solely on the basis of the existing radio environment, type of service and location of operation.

The REL is up-dated and re-issued four times per year. Departmental offices across Canada are kept informed of new certifications and changes.

## AVANT-PROPOS

La Nomenclature du Matériel Radio (NMR) est une publication du ministère des Communications qui donne la liste du matériel radio pour lequel un certificat a été délivré pour utilisation au Canada.

La certification du matériel radio signifie que ce matériel répond aux exigences des cahiers des charges établis sur les normes radioélectriques ou aux exigences de normes techniques générales, en conformité de la Procédure no 100 sur les normes radioélectriques. Un certificat d'Homologation ou d'Acceptabilité Technique est délivré selon le cas. S'il y a lieu de le faire, une licence en vue de l'utilisation de matériel certifié est exigée séparément et accordée seulement après étude du milieu radioélectrique ambiant, du genre de service radio existant et de l'emplacement de la station.

La NMR est mis à jour et rééditée quatre fois par année. Les bureaux du Ministère, à l'échelle du pays, sont informés régulièrement du nouveau matériel radio certifié et des changements apportés aux inscriptions.

# INTRODUCTION

## PART A

Part A of the Radio Equipment List covers radio equipment which have been granted certificates of type-approval under an established Radio Standards Specification. A licence to operate this equipment is required.

The frequency range of equipment approved under some specifications may be beyond the frequency range of the applicable specification. Frequency assignments are controlled by the Department through the licensing process.

This part is divided into sections according to the specification under which the equipment complies. The sections are as follows:

RSS 117 Land and Coast Station Transmitters using A1A, A2A, A3E, H2A, or H3E Emissions Operating in the 200 - 535 kHz Band.

RSS 118 Land and Subscriber Stations: Voice, Data and Tone Modulated, Angle Modulation Radiotelephone Transmitters and Receivers Operating in the Cellular Bands 824 - 849 MHz and 869 - 894 MHz. (Subscriber stations are licence exempt)

RSS 119 Land and Mobile Stations, 27.41 to 960 MHz; 20, 25, and 30 kHz Channelling.

RSS 120 Portable Voice and Data Modulated AM or FM Radiotelephone Transmitters and Receivers Operating in the Allocated VHF / UHF Bands in the Frequency Range 27.41 to 866 MHz with R.F. Power Output not Exeeding 3 Watts.

# INTRODUCTION

## PARTIE A

La Partie A de la Nomenclature du Matériel Radio comprend tout le matériel radio qui a fait l'objet d'une délivrance de certificat d'Homologation, en conformité d'un Cahier des Charges sur les Normes Radioélectriques. Une licence d'opération est exigée pour ce matériel.

Il se peut que la gamme de fréquences indiquées pour le matériel homologué dépasse celle qui est prescrite par le cahier des charges en vertu duquel l'homologation a été effectuée. Les attributions de fréquence d'opération sont sous le contrôle du procédé de délivrance de licence du Ministère.

Cette partie est divisée en sections, selon le Cahier des Charges sur les Normes Radioélectriques en conformité duquel le matériel a été homologué. Ces sections sont les suivantes:

CNR 117 Émetteurs de Station Terrestre ou de Station Côtière à Émission A1A, A2A, A3E, H2A, ou H3E Fonctionnant dans la Bande de 200 à 535 kHz.

CNR 118 Émetteurs et Récepteurs Radiotéléphoniques de Station de Base et de Station d'Abonné à Modulation Angulaire par Fréquences Vocales, (Signaux de Données ou Tonalités) Fonctionnant dans les Bandes du Service Mobile Cellulaire Comprises Entre 824 - 849 MHz et 869 - 894 MHz. (Les stations d'abonnés sont exemptées d'une licence).

CNR 119 Stations Terrestres et Mobiles Exploitées dans la Bande 27,41 - 960 MHz avec un Espacement Entre les Voies de 20 à 30 kHz.

CNR 120 Émetteurs-Récepteurs Radiotéléphoniques MA ou MF Portatifs à Modulation par Fréquences Vocales et à Modulation Numérique Fonctionnant dans les Bandes VHF/UHF Attribuées dans la Gamme de Fréquences 27,41 à 866 MHz avec une Puissance de Sortie RF d'au plus 3 Watts.

RSS 121 Mobile Stations: Voice and Data Modulated FM or PM Radiotelephone Transmitters or Receivers Operating in the Allocated VHF / UHF Bands in the Frequency Range 27.41 to 866 MHz with R.F. Power Output not Exceeding 10 Watts.

RSS 122 Land and Mobile FM or PM Radiotelephone Transmitters and Receivers Operating in the Allocated Bands in the 400 - 960 MHz Range Using 12.5 kHz Spacing.

RSS 125 Land and Mobile Station Single Sideband Radiotelephone Transmitters and Receivers for use in the 1,605 to 28,000 kHz Band; (Maximum Transmitter RF Power Output: One Kilowatt Peak Envelope Power).

RSS 140 Land and Mobile Station AM Radiotelephone Transmitters and Receivers Operating in the 27.28 to 50 MHz Band with 20 kHz Channel Spacing.

RSS 150 AM Broadcasting Transmitting Equipment.

RSS 153 FM Broadcasting Transmitting Equipment.

RSS 154 Television Broadcasting Transmitting Equipment.

RSS 180 Land and Mobile Station Single Sideband Transmitters and Receivers Operating in the 1,605 - 28,000 kHz Band with Maximum RF Power Output not more than 10 Watts PEP.

RSS 181 Coast and Ship Station Single Sideband Radiotelephone Transmitters and Receivers Operating in the 1,605 to 28,000 kHz Band.

RSS 182 Marine Radio Telephones, Frequency or Phase Modulated Operating in the 156 - 162.5 MHz Band.

## PART B

Part B covers radio equipment which have been granted certificates of technical acceptability under general technical requirements, in accordance with Radio Standards Procedure 100. A licence to operate this equipment is required.

CNR 121 Émetteurs-Récepteurs Radiotéléphoniques MF ou MP de Station Mobile à Modulation par Fréquences Vocales et à Modulation Numérique Fonctionnant dans les Bandes VHF/UHF Attribuées dans la Gamme de Fréquences 27,41 à 866 MHz avec une Puissance de Sortie RF d'au plus 10 Watts.

CNR 122 Stations Terrestres et Mobiles Exploitées dans la Bande 400 à 960 MHz, avec un Espacement Entre les Voies de 12,5 kHz.

CNR 125 Émetteurs et Récepteurs Radiotéléphoniques à Bande Latérale Unique de Station Terrestre et de Station Mobile pour Utilisation dans la Bande de 1 605 à 28 000 kHz. (Puissance de Crête Maximale de Sortie HF de l'Émetteur: 1 Kilowatt).

CNR 140 Émetteurs et Récepteurs Radiotéléphoniques AM de Station Terrestre et Mobile Fonctionnant dans la Bande de 27,28 à 50 MHz avec Espacement Entre Voies de 20 kHz.

CNR 150 Matériel d'Émission de Radiodiffusion AM.

CNR 153 Matériel d'Émission de Radiodiffusion FM.

CNR 154 Matériel d'Émission de Radiodiffusion Télévisuelle.

CNR 180 Émetteurs-Récepteurs Radiotéléphoniques à Bande Latérale Unique de Station Terrestre et de Station Mobile Fonctionnant dans la Bande de 1 605 à 28 000 kHz avec une Puissance de Crête d'au plus 10 Watts.

CNR 181 Émetteurs et Récepteurs Radiotéléphoniques à Bande Latérale Unique de Station Côtière et de Station de Navire Fonctionnant dans la Bande de Fréquences de 1 605 à 28 000 kHz.

CNR 182 Appareils Radiotéléphoniques Maritimes à Modulation de Fréquence ou de Phase Fonctionnant dans la Bande de Fréquences 156 à 162,5 MHz.

## PARTIE B

La Partie B comprend le matériel radio qui a fait l'objet d'une délivrance de certificat d'Acceptabilité Technique, selon les exigences de normes techniques générales, en conformité de la Procédure no 100 sur les Normes Radioélectriques. Une licence d'opération est exigée pour ce matériel.

Note: The technical acceptability of radio equipment does not necessarily mean that stations proposing the use of such equipment will be licensed automatically for the service or services indicated. It means only that, from a technical point of view, the listed equipment is capable of performing in a satisfactory manner. From time-to-time the Department may request additional data to prove that the proposed equipment can satisfactorily provide a specific service or can operate satisfactorily under specific conditions.

PART C

Part C covers certain low power radio equipment, for use in special applications, which have been granted certificates of technical acceptability under general technical requirements, in accordance with Radio Standards Procedure 100. A licence to operate this equipment is required.

PART E

Part E covers radio equipment, acceptable for use in the Broadcast Service, which have been granted certificates of technical acceptability under general technical requirements, in accordance with Radio Standards Procedure 100.

PART J

Part J covers licence exempt radio equipment which have been granted certificates of type-approval under an established Radio Standards Specification.

As in Part A, this part is also divided into sections according to the specification under which the equipment complies. The sections are as follows:

RSS 136 Land and Mobile Station Radiotelephone Transmitters and Receivers Operating in the 26.960 - 27.410 MHz General Radio Service Band.

RSS 147 Emergency Locator Transmitters Operating at 121.5 MHz or 121.5 MHz and 243.0 MHz.

RSS 187 Marine Emergency Position Indicating Radio Beacon (EPIRB) Transmitters Operating at 121.5 MHz, 243.0 MHz or 406.025 MHz.

RSS 201 Radio Paging Receivers.

Remarque: L'acceptabilité technique de matériel radio ne veut pas nécessairement dire que les stations qui en projettent l'emploi se verront automatiquement délivrer une licence autorisant le service ou les services mentionnés. Elle signifie seulement que, du point de vue technique, le matériel inscrit dans la Nomenclature peut fonctionner de manière satisfaisante. À l'occasion, le Ministère peut demander des données supplémentaires démontrant que le matériel dont l'emploi est projeté peut assurer de façon satisfaisante un service déterminé ou peut fonctionner de façon satisfaisante dans les conditions données.

PARTIE C

La Partie C comprend certain matériel radio de faible puissance pour applications spéciales, qui a fait l'objet d'une délivrance de certificat d'Acceptabilité Technique, selon les exigences de normes techniques générales, en conformité de la Procédure no 100 sur les Normes Radioélectriques. Une licence d'opération est exigée pour ce matériel.

PARTIE E

La Partie E comprend le matériel radio, utilisé dans le service de la radiodiffusion, qui a fait l'objet d'une délivrance de certificat d'Acceptabilité Technique, selon les exigences de normes techniques générales, en conformité de la Procédure no 100 sur les Normes Radioélectriques.

PARTIE J

La Partie J comprend le matériel radio, exempt d'une licence d'opération, qui a fait l'objet d'une délivrance de certificat d'Homologation, en conformité d'un Cahier des Charges sur les Normes Radioélectriques.

Comme à la Partie A, cette partie est aussi divisée en sections selon le Cahier des Charges sur les Normes Radioélectriques, en conformité duquel le matériel a été homologué. Ces sections sont les suivantes:

CNR 136 Émetteurs et Récepteurs Radiotéléphoniques de Station Terrestre et de Station Mobile Fonctionnant dans la Bande de 26,960 à 27,410 MHz du Service Radio Général.

CNR 147 Radiobalises de Secours Fonctionnant sur 121,5 MHz ou 121,5 MHz et 243,0 MHz.

CNR 187 Radiobalises de Localisation des Sinistres (RLS) Maritimes Fonctionnant sur 121,5 MHz et 243,0 MHz ou 406,025 MHz.

CNR 201 Récepteurs de Téléappel.

RSS 209 Cordless Telephones in the Bands 46 MHz and 49 MHz.

RSS 214 Low Power Wireless Microphones and Telemetering Devices for One-way Communication Operating in the FM Broadcasting Band 88 - 108 MHz.

PART K

Part K covers licence exempt radio equipment which have been granted certificates of technical acceptability under general technical requirements, in accordance with Radio Standards Procedure 100.

PART L

Part L covers low power announcement transmitters operating in the AM and FM broadcast bands, which have been granted certificates of technical acceptability under the Telecommunications Regulation Circular TRC-74, in accordance with Radio Standards Procedure 100.

EXPLANATION OF COLUMN HEADINGS

1. Model/Type Number - This is the model or type number assigned to the equipment by the manufacturer for identification purposes. Note: Where sub units of equipment are required to make up a given receiver or transmitter, all of the model numbers involved are grouped together as one model number. The individual model numbers of the sub units are separated by an oblique stroke. Radio frequency power amplifiers are only approved with an associated exciter and are listed only as combined units.

2.(a) Type-approval Number - This is the certification number assigned to each piece of equipment which has been granted certification under an established Radio Standards Specification. This number incorporates three distinctive parts; namely, the company code assigned by the Department, the specification number and its issue number, and a sequentially assigned number. For example, in Part A, for RSS 119, we have the number 100193997I. The first part of the number shows the assigned company code, in this case (100). Company codes may be of three or four digits. The next three digits (193) indicates the Radio Standards Specification 119 and its issue number 3, being the last two digits of the specification and its issue number. The following part is the sequentially assigned number, in this case (997), indicating the number of certifications granted under this issue of the Specification.

CNR 209 Téléphones Sans Cordon dans les Bandes de 46 MHz et de 49 MHz.

CNR 214 Microphones Sans Fils et Dispositifs de Télémesure à Faible Puissance, pour Communications Unilatérales, Fonctionnant dans la Bande de Radiodiffusion FM de 88 à 108 MHz.

PARTIE K

La Partie K comprend le matériel radio, exempt d'une licence d'opération, qui a fait l'objet d'une délivrance de certificat d'Acceptabilité Technique, selon les exigences de normes techniques générales, en conformité de la Procédure no 100 sur les Normes Radioélectriques.

PARTIE L

La Partie L comprend le matériel radio, utilisé comme émetteurs d'annonces de faible puissance exploités dans les bandes de fréquences de radiodiffusion AM/FM, qui a fait l'objet d'une délivrance de certificat d'Acceptabilité Technique, selon les exigences de la Circulaire de la Réglementation des Télécommunications CRT-74, en comformité de la Procédure no 100 sur les Normes Radioélectriques.

Explication des En-Têtes de Colonne

1. No. Modèle/Type - Ceci est le numéro de modèle ou de type attribué au matériel par le fabriquant aux fins d'identification. Remarque: Dans le cas où il faut utiliser plus d'un sous-élément de matériel pour composer un récepteur ou un émetteur particulier, tous les numéros de modèle des divers composants sont groupés pour n'en former qu'un seul et ils sont séparés par une oblique. Les amplificateurs de puissance RF ne sont approuvés qu'en combinaison avec un excitateur connexe et ils ne sont inscrits qu'en tant que matériel combiné.

2.(a) No. d'Homologation - Ceci est le numéro attribué à chaque appareil qui a fait l'objet d'une certification, en conformité d'un Cahier des Charges sur les Normes Radioélectriques. Ce numéro est composé de trois parties distinctes; notamment, le code de compagnie attribué par le Ministère, le numéro du cahier des charges et son numéro d'édition, et un numéro séquentiel. Par exemple, dans la Partie A sous le CNR-119, on peut trouver le numéro d'homologation 100193997I. La première partie du numéro nous indique le code de compagnie attribué; dans le cas présent, (100). Les codes de compagnies peuvent être de trois ou quatre chiffres. Les trois chiffres suivant (193) nous indiquent le cahier des charges no 119 et sa 3e édition, représenté par les deux derniers chiffres du cahier des charges et son numéro d'édition. La partie suivante est le numéro attribué par ordre numérique (997) indiquant qu'il s'agit de la 997e certification accordée en

In some cases one or more suffix letters are also added to the type-approval number. These letters are required to indicate such aspects as duty cycle etc., as stated in certain specifications.

2.(b) Technical Acceptability Number - This is the certification number assigned to each piece of equipment which has been granted certification under general technical requirements, in accordance with Radio Standards Procedure 100. This number incorporates three distinctive parts; namely, the company code assigned by the Department (first three or four digits), the REL Part identification letter, and a sequentially assigned number of three or four digits.

Class - Technically accepted equipment is assigned an equipment classification code number to identify the type of service for which the equipment is certified. The code is made-up from one selection from each of the following two tables.

Table I - Type of Equipment

1. Aircraft Station
2. Ship / Coast Station
3. Land Station
4. Broadcast Station
5. Miscellaneous Equipment

Table II - Type of Service

1. Radionavigation & Communication / Direction Finding
2. Remote Control System
3. Alarm / Security / Transponder System
4. Radar
5. Satellite Communication
6. Receiver (Stand Alone Monitor or Controller)

7. Paging
8. Wireless Microphone System
9. Telemetry System
10. Speed / Distance Measuring
11. Cellular Telephone
12. Radio Link / Repeater / Point-to-Multipoint

13. Aeronautical Communication
14. TV Transmission (Video Equipment)
15. Auditory Assistance
16. Data / Scrambling / Voice Communications
17. Spread Spectrum Transmission
18. Global Positioning System (GPS)

comformité de ladite édition du cahier des charges en question.

Dans certains cas, une à quatre lettres sont placées en suffixe du numéro d'homologation. Ces lettres sont requisent pour indiquer certains aspects d'utilisation du matériel, conformément à certaines spécifications.

2.(b) Numéro d'Acceptabilité Technique - Ceci est le numéro attribué à chaque appareil qui a fait l'objet d'une certification, selon les exigences de normes générales, en conformité de la Procédure no 100 sur les Normes Radioélectriques. Ce numéro est composé de trois parties distinctes; notamment, le code de compagnie attribué par le Ministère (indiqué par les premiers trois ou quatre chiffres), la lettre d'identification de la Partie de la NMR, et un numéro attribué par ordre numérique.

Classe - Cette colonne indique le code de classification attribué à l'appareil et sert à identifier le genre de service pour lequel il est certifié. Elle s'applique seulement au matériel radio qui a fait l'objet d'une délivrance d'un certificat d'Acceptabilité Technique. Le code est composé selon une sélection tiré de chacun des deux tableaux suivants.

Tableau I - Type de Matériel

1. Station d'Aéronef
2. Station de Navire / Côtière
3. Station Terrestre
4. Station de Radiodiffusion
5. Matériel Divers

Tableau II - Type de Service

1. Radionavigation & Communication / Radiogoniométrie.
2. Système de Télécommande.
3. Système d'Alarme / de Sécurité / de Répondeur.
4. Radar.
5. Communication par Satellite.
6. Récepteur (d'Écoute ou de Commande ne faisant pas partie d'un système).
7. Téléappel.
8. Microphone sans Fil.
9. Système de Télémétrie.
10. Télémesure de Vitesse / Distance.
11. Téléphone Cellulaire.
12. Liaison Hertzienne / Répéteur / Point Fixe-à-Multipoints.
13. Communication Aéronautique.
14. Télédiffusion (Matériel Vidéo).
15. Aide Auditive.
16. Communication Numérique / Brouillée / Vocale.
17. Émission à Étallement Spectral.
18. Système d'Orientation Mondiale.

19. Emergency Position Indicating Beacon Transmitter
20. Wireless Intercom
21. Announcement Transmitter (LPAS) in AM/FM Broadcast Bands
22. Cordless Telephone
23. Communications Equipment Restricted to Certain Categories of Users for Safety and Security
24. INMARSAT System
25. LORAN-C Navigation System
26. OMEGA Navigation System

Note: An asterisk (*), prefixing a type-approval or technical acceptability number, indicates a new or amended entry.

3. Occupied Bandwidth and Type of Emission - The necessary bandwidth and type of emission is indicated as described by the International Telecommunications Union (I.T.U.).

4. Power - The R.F. power output is indicated in various orders of magnitude of the unit of Watt. For single-sideband suppressed carrier emissions, the power is expressed as peak envelope power (PEP); for single-sideband full carrier emissions, the power is expressed as carrier power (one quarter of the PEP referred to above).

5. Frequency Range - This is the range of frequencies over which the equipment is designed to operate and shows the low and high limits respectively. Where only one frequency is indicated, that particular equipment was certified to operate on a specific frequency. The frequencies are indicated in various orders of magnitude of the unit of Hertz.

## REFERENCE LIST OF CERTIFICATE HOLDERS

In each Part of the REL, the names of certificate holders, listed in alphabetical order, are found immediately preceding groups of equipment. The certificate holders name is followed by its assigned company code number.

The following list is in two cross referenced sections and is included to assist in the location of equipment throughout the book.

Section 1. Alphabetical List

Section 2. Numerical List

19. Radiobalise de Localisation des Sinistres.
20. Interphone sans Fil.
21. Émetteur d'Annonces dans les Bandes de Radiodiffusion AM/FM.
22. Téléphone sans Cordon.
23. Matériel de Communications Restreint à Certains Groupes pour la Sécurité Publique.
24. Système INMARSAT.
25. Système de Navigation LORAN-C.
26. Système de Navigation OMEGA.

Remarque: Un astérisque (*) placé devant le numéro d'homologation ou le numéro d'acceptabilité technique désigne une nouvelle entrée ou une entrée modifiée.

3. Largeur de Bande et Type d'Émission - Cette colonne indique la largeur de bande nécessaire et le type d'émission suivant la méthode adoptée par l'Union Internationale des Télécommunications.

4. Puissance - La puissance de sortie HF est indiquée en différentes ordres de grandeur de l'unité de Watt. En ce qui concerne les émissions à bande latérale unique avec onde porteuse supprimée, la puissance est exprimée en tant que puissance d'enveloppe de crête; lorsque l'onde porteuse n'est pas supprimée, la puissance est exprimée en tant que puissance porteuse (un quart de la puissance d'enveloppe de crête susmentionnée).

5. Gamme de Fréquences - Il s'agit de la gamme de fréquences dans laquelle le matériel peut fonctionner; les limites inférieure et supérieure sont données. Lorsqu'une seule fréquence est indiquée, l'appareil est censé fonctionner sur une fréquence déterminée. Les fréquences sont indiquées en différentes ordres de grandeur de l'unité de Hertz.

## NOMENCLATURE DE RÉFÉRENCE DES NOMS DE COMPAGNIE

Dans chacune des Parties de la NMR, les noms des détenteurs de certificats apparaissent immédiatement avant les inscriptions du matériel certifié. Ces noms sont regroupés par ordre alphabétique et suivis de leur numéro de code de compagnie respectif.

La nomenclature ci-dessous comprend deux sections de renvois; elle a pour but d'aider le lecteur à trouver le matériel radio certifié.

Section 1. Par ordre alphabétique de détenteurs de certificats.

Section 2. Par ordre numérique de détenteurs de certificats.

SECTION 1 ALPHABETICAL LISTING/LISTE ALPHABÉTIQUE
