WITHDRAWAL

October 2011

Selected standards in the series Paints, pigments and related products

These CGSB standards and National Standards of Canada are hereby withdrawn due to limited use and support for their revision.

The Standards Council of Canada requires that accredited Standards Development Organizations, such as the CGSB, regularly review a consensus Standard to determine whether to re-approve, revise or withdraw. The review cycle is normally five years from the publication date of the latest edition of the Standard.

The information contained in these Standards was originally developed pursuant to a voluntary standards development initiative of the CGSB. The information contained therein may no longer represent the most current, reliable, and/or available information on these subjects. CGSB hereby disclaims any and all claims, representation or warranty of scientific validity, or technical accuracy implied or expressed respecting the information therein contained. The CGSB shall not take responsibility nor be held liable for any errors, omissions, inaccuracies or any other liabilities that may arise from the provision or subsequent use of such information. These Standards are

RETRAIT

Octobre 2011

Sélection de normes de la série Peintures, pigments et produits connexes

Ces normes de l'ONGC et ces Normes nationales du Canada sont retirées par le présent avis en raison de leur utilisation limitée et du manque de support pour leur révision.

Le Conseil canadien des normes exige que les organismes accrédités d'élaboration de normes, tel que l'ONGC, effectue régulièrement un examen des normes consensuelles afin de déterminer s'il y a lieu d'en renouveler l'approbation, de les réviser ou de les retirer. Le cycle d'examen d'une norme est généralement de cinq ans à partir de la date de publication de la dernière édition de celle-ci.

L'information contenue dans ces normes a été élaborée initialement en vertu d'une initiative volontaire d'élaboration de normes de l'ONGC. Elle peut ne plus représenter l'information disponible et/ou l'information la plus actuelle ou la plus fiable à ce sujet. L'ONGC décline par la présente toute responsabilité à l'égard de toute affirmation, déclaration ou garantie de validité scientifique ou d'exactitude technique implicite ou explicite relative à l'information contenue dans ces normes. L'ONGC n'assumera aucune responsabilité et ne sera pas tenu responsable quant à toute erreur, omission, inexactitude ou autre conséquence pouvant découler de la fourniture ou de l'utilisation subséquente de

to be referred to for archival purposes only as their content has been repealed as of the date on this withdrawal notice.

Archived copies of withdrawn standards for historic or archival purposes are still available from the CGSB Sales Centre by telephone at 819-956-0425 or 1-800-665-2472, by fax at 819-956-5740, by Internet at www.tpsgc-pwgsc.gc.ca/ongc-cgsb/, by e-mail at ncr.CGSB-ONGC@tpsgc-pwgsc.gc.ca or by mail at Sales Centre, Canadian General Standards Board, 11 Laurier Street, Gatineau, Canada K1A 1G6.

National Standard of Canada

The CANADIAN GENERAL STANDARDS BOARD (CGSB), under whose auspices this National Standard of Canada has been developed is a government agency within Public Works and Government Services Canada. CGSB is engaged in the production of voluntary standards in a wide range of subject areas through the media of standards committees and the consensus process. The standards committees are composed of representatives of relevant interests including producers, consumers and other users, retailers, governments, educational institutions, technical, professional and trade societies, and research and testing organizations. Any given standard is developed on the consensus of views expressed by such representatives.

CGSB has been accredited by the Standards Council of Canada as a national standards-development organization. The standards that it develops and offers as National Standards of Canada conform to the criteria and procedures established for this purpose by the Standards Council of Canada. In addition to standards it publishes as national standards, CGSB produces standards to meet particular needs, in response to requests from a variety of sources in both the public and private sectors. Both CGSB standards and CGSB national standards are developed in conformance with the policies described in the CGSB Policy Manual for the Development and Review of Standards.

CGSB standards are subject to review and revision to ensure that they keep abreast of technological progress. Suggestions for their improvement, which are always welcome, should be brought to the notice of the standards committees concerned. Changes to standards are issued either as separate amendment sheets or in new editions of standards.

An up-to-date listing of CGSB standards, including details on latest issues and amendments, and ordering instructions, is found in the CGSB Catalogue, which is published annually and is available without charge upon request. An electronic version, ECAT, is also available. More information is available about CGSB products and services at our Web site — www.ongc-cgsb.gc.ca.

Although the intended primary application of this standard is stated in its Scope, it is important to note that it remains the responsibility of the users of the standard to judge its suitability for their particular purpose.

The testing and evaluation of a product against this standard may require the use of materials and/or equipment that could be hazardous. This document does not purport to address all the safety aspects associated with its use. Anyone using this standard has the responsibility to consult the appropriate authorities and to establish appropriate health and safety practices in conjunction with any applicable regulatory requirements prior to its use. CGSB neither assumes nor accepts any responsibility for any injury or damage that may occur during or as the result of tests, wherever performed.

Attention is drawn to the possibility that some of the elements of this Canadian standard may be the subject of patent rights. CGSB shall not be held responsible for identifying any or all such patent rights. Users of this standard are expressly advised that determination of the validity of any such patent rights are entirely their own responsibility.

The STANDARDS COUNCIL OF CANADA is the co-ordinating body of the National Standards System, a federation of independent, autonomous organizations working towards the further development and improvement of voluntary standardization in the national interest.

The principal objectives of the Council are to foster and promote voluntary standardization as a means of advancing the national economy, benefiting the health, safety and welfare of the public, assisting and protecting the consumer, facilitating domestic and international trade, and furthering international co-operation in the field of standards.

A National Standard of Canada is a standard which has been approved by the Standards Council of Canada and one which reflects a reasonable agreement among the views of a number of capable individuals whose collective interests provide, to the greatest practicable extent, a balance of representation of producers, users, consumers and others with relevant interests, as may be appropriate to the subject in hand. It normally is a standard that is capable of making a significant and timely contribution to the national interest.

Approval of a standard as a National Standard of Canada indicates that a standard conforms to the criteria and procedures established by the Standards Council of Canada. Approval does not refer to the technical content of the standard; this remains the continuing responsibility of the accredited standards-development organization.

Those who have a need to apply standards are encouraged to use National Standards of Canada whenever practicable. These standards are subject to periodic review; therefore, users are cautioned to obtain the latest edition from the organization preparing the standard.

The responsibility for approving National Standards of Canada rests with the:

Standards Council of Canada
270 Albert Street
Suite 200
Ottawa, Ontario

CANADIAN GENERAL STANDARDS BOARD

INTERIOR LATEX LOW GLOSS PAINT

1. SCOPE

- 1.1 This standard applies to an interior latex low gloss paint for use on walls and ceilings, either new or previously painted.
- 1.2 The paint is suitable for most types of wall surfaces, including wallboard, gypsum board, dry plaster, cement, brick and concrete block. For bathrooms and kitchens, coatings complying with CAN/CGSB-1.195 or CAN/CGSB-1.202, Type 2 may be preferable.
- 1.3 The paint is self-priming and alkali resistant. Generally, no primers or sealers are required, and two coats of paint complying with this standard will be adequate for most jobs. Abrade glossy surfaces to a dull finish prior to application to assure adequate adhesion.
- 1.4 The testing and evaluation of a product against this standard may require the use of materials and/or equipment that could be hazardous. This document does not purport to address all the safety aspects associated with its use. Anyone using this standard has the responsibility to consult the appropriate authorities and to establish appropriate health and safety practices in conjunction with any applicable regulatory requirements prior to its use.

2. REFERENCED PUBLICATIONS

CAN/CGSB-1.202 — Interior Low Gloss Alkyd Enamel
22.1 — Flat Hog-Bristle Brushes for Paint, Varnish, Enamel and Lacquer
22.8 — Flat Brushes With Nylon or Polyester Filaments for Paint, Varnish, Enamel and Lacquer.
- 2.1.2 Health Canada
Surface Coating Materials Regulations
Consumer Chemicals and Containers Regulations, 2001
Controlled Products Regulations (WHMIS)¹.
- 2.1.3 ASTM International
D 1210 — Standard Test Method for Fineness of Dispersion of Pigment-Vehicle Systems by Hegman-Type Gage
D 2486 — Standard Test Methods for Scrub Resistance of Wall Paints
E 1347 — Standard Test Method for Color and Color-Difference Measurement by Tristimulus (Filter) Colorimetry.

¹ WHMIS: Workplace Hazardous Materials Information System.

2.1.4 U.S. General Services Administration

Federal Standard

595B — Colors Used in Government Procurement.

2.2 A dated reference in this standard is to the issue specified. An undated reference in this standard is to the latest issue, unless otherwise specified by the authority applying this standard. The sources are given in the Notes section.

3. GENERAL REQUIREMENTS

3.1 The paint shall consist of suitable pigment mixtures, adequately dispersed in a latex vehicle.

3.2 The paint shall be suitable for brushing, roller-coating and spraying when reduced in accordance with the manufacturer's instructions, and shall be readily mixed to a uniform consistency by stirring.

3.3 The paint shall produce a smooth, uniform low-gloss coating, free from agglomerates, streaks and lap marks.

3.4 When stored at temperatures between 5 and 40°C, the paint shall not skin, gel, thicken excessively or cake in the original unopened container for one year from the date of shipment. At the end of this time it shall be readily mixed to a uniform condition by stirring and shall meet the requirements for applicability and appearance (par. 4.12). The container shall not show signs of deterioration or rust, except around the rim where some rust is permissible.

3.5 **Colour** — The colour of the paint shall conform to U.S. Federal Standard 595B colour and number or to an adequately defined colour standard, as specified (par. 7.1). Medium and dark colours may burnish due to a lower abrasion resistance.

3.6 **Toxic Elements** — This paint shall conform to the requirements of the *Surface Coating Materials Regulations*, the *Consumer Chemicals and Containers Regulations*, 2001, and the *Controlled Products Regulations* (WHMIS), for designated toxic elements.

4. DETAILED REQUIREMENTS

The paint shall comply with the following detailed requirements when tested in accordance with the specified test method:

		Test Method			
		Min.	Max.	CGSB 1-GP-71	ASTM
4.1	Consistency, Krebs units	80	—	4.5	—
4.2	Drying time, dry hard, h	—	2	5, Method A	—
4.3	Gloss, units				
	60°	—	15	13.1	—
	85°	10	45	—	—
4.4	Fineness of grind, Hegman	4	—	—	D 1210
4.5	Colour Uniformity — In the case of tinted paints, there shall be no difference in colour when one area of the film is rubbed until it begins to set and the remainder is allowed to dry untouched when tested in accordance with CGSB standard 1-GP-71, Method 12.8				
4.6	Hiding Power — When applied by drawdown on a black-and white or black-and-grey hiding power chart to a wet film thickness of 100 µm, for all colours except white, which is 125 µm, the contrasting squares of the chart shall not be visible when tested in accordance with CGSB standard 1-GP-71, Method 14.1.				
4.7	Alkali Resistance — Two coats of paint that have dried 48 h shall withstand the action of 0.1 mol/L sodium hydroxide solution for 15 min without blistering, lifting or wrinkling when examined immediately in accordance with CGSB standard 1-GP-71, Method 106.3. After subsequent drying for 30 min, there shall be no change from the original colour.				

- 4.8 **Cleansability** — Soil shall be easily removed from the paint film without creating areas differing in appearance from the rest of the surface when tested in accordance with CGSB standard 1-GP-71, Method 114.2.
- 4.9 **Flexibility** — The dried paint film shall not crack or peel when subjected to the bending test at 23°C using a 6.4 mm mandrel, in accordance with CGSB standard 1-GP-71, Method 119.5.
- 4.10 **Scrubbability** — A paint film having a dry film thickness of $35 \pm 5 \mu\text{m}$ and dried for 7 d shall withstand 1000 cycles in the scrubability machine without the scrubbed and unscrubbed portions showing more than a slight difference in colour (CGSB standard 1-GP-71, Method 143.1, rating #6), when tested in accordance with par. 6.2.1.
- 4.11 **Sealing Properties** — When the paint is applied over sealed and unsealed areas of a Penopac Chart, the reflectance of the unsealed area shall not be more than $\pm 7\%$ of the sealed area when tested in accordance with par. 6.2.2.
- 4.12 **Applicability and Appearance** — A test panel shall be prepared as outlined in par. 6.2.3. There shall be no runs, sags or coarse particles. When viewed from 1.5 m, the dried film shall not contain craters or bubbles. The finish shall be uniform in texture, gloss and colour, and the black "X" should not be discernible.

5. PREPARATION FOR DELIVERY

- 5.1 Unless otherwise specified (par. 7.1), preparation for delivery shall conform to normal commercial practice.
- 5.2 **Labelling** — In addition to complying with the labelling requirements of any relevant acts or regulations, each container shall be suitably labelled to show the following information:

Name of material

Standard number: CAN/CGSB-1.209-2003

Colour

Manufacturer's name and address

Manufacturer's batch number

Manufacturer's code number

Date of manufacture

Thinning instructions (with water) for spraying

Cautionary notes:

— The paint should be kept from freezing.

— The paint should not be intermixed with other paints without prior approval of the manufacturer.

6. INSPECTION

- 6.1 **Sampling** — Sampling shall be carried out in accordance with CGSB standard 1-GP-71, Method 1.1.
- 6.2 **Testing**
- 6.2.1 **Scrubbability** — Test the paint in accordance with CGSB standard 1-GP-71, Method 125.1 but use unprimed Leneta Panels, form P-121-10N, held in place on a glass plate in the washability machine as described in ASTM D 2486. Twenty-four hours before the test, protect both ends of the test panel for a distance of 110 mm with a coat of varnish.
- 6.2.2 **Sealing Properties (Self-Sealing)** — Tint the paint under test with a universal colorant to a reflectance of 35 to 40%, as measured in accordance with ASTM E 1347. Apply the tinted finish to a Penopac Chart, Form 1A, with an applicator to a dry film thickness of 25 to 37 μm . During the application hold the charts flat with a vacuum plate. After drying 72 h, measure the reflectance of the sealed and unsealed areas of the chart in accordance with ASTM E 1347. Record the difference in reflectance and calculate as a percentage of the reflectance over the sealed area.

- 6.2.3 **Applicability and Appearance** — Mount a 1.2 × 1.2 m panel of gypsum plasterboard vertically. Using a roller or spray application to eliminate brush marks, apply a coat of primer-sealer (CAN/CGSB-1.119) that has been tinted to the colour Grey 36373 of U.S. Federal Standard 595B. After drying 2 h, brush on a coat of flat black latex paint (CAN/CGSB-1.100) to form an “X” from corner to corner, with arms approximately 150 mm wide, the edges staggered and feathered, and allow to dry 24 h. Wet out the paint onto a 190 mm roller having a nap length of 5 mm. Using the wetted roller, apply the paint to the entire face of the panel. Note the ease of rolling and the foaming characteristics. Allow the panel to dry 18 h. Apply a second coat of the paint by spray to the left half of the panel. Note the spraying characteristics. To the right half of the panel, brush a 100 mm wide band around the perimeter using a 75 mm wide brush conforming to CGSB specification 22.1 or 22.8. Note the brushing characteristics. Five minutes after completion of the brush coat, apply a coat by roller to the right half of the panel, overlapping the sprayed and brushed coats by approximately 50 mm. After drying 24 h, examine the panel.

7. NOTES

- 7.1 **Options** — The following options must be specified in the application of this standard:

- a. Colour (par. 3.5)
- b. Preparation for delivery if other than as specified (par. 5.1).

7.2 Recommended Practice

- 7.2.1 This paint should not be applied at temperatures below 10°C or on surfaces covered by condensation.
