INTRODUCTION

These tabulations represent the most recent output received from Judicial Division, Statistics Canada, in the continuing study of parole recidivism. They are preceded by an analysis completed within the Statistics Division of the Ministry Secretariat.

For the purposes of this study, recidivism is considered to represent a revocation or forfeiture of parole or conviction for an indictable offence following release on parole and within the one-year follow-up period involved. The Criminal Records Section of the R.C.M. Police furnishes up-dated copies of the F.P.S. Record which serve as the source for determining subsequent convictions.

Excluded from the study are those cases that were released on parole that did not necessarily involve exposure to a supervisory relationship, i.e. those case released on Short Parole, Day Parole, Parole for Deportation or Voluntary Departure.

Specifically, this material considers recidivism patterns for a twelve-month period following release on parole in 1971. For example, if the parole release was in January, 1971, the twelve month period would terminate one day prior to the anniversary in January, 1972. It should be noted that the content relates to parole releases from penitentiaries only.

The tables are numbered according to the following configuration:

- 71.X.X. - The Year of Release
- XX.1.X. - Ordinary & Minimum Parole Releases
- XX.2.X. - Ordinary Parole Releases
- XX.3.X. - Minimum Parole Releases

- XX.X.1. - Type of Recidivism by Time Elapsed after Release
- XX.X.2. - Type of Recidivism by Time Elapsed after Release, Accumulative Totals
- XX.X.3. - Recidivism and Parole Status at Time of Recidivism, by Time Period

Copies of Parole Recidivism Study, as of June 1972 (5-year follow-up of releases from 1963-1966); Five-Year Follow-Up of 1967 Paroles Releases, and One-Year Follow-Up of 1970 Penitentiary Parole Releases, may be obtained from the Information Division, Ministry of the Solicitor General, Ottawa, Ontario. K1A 0P8.

ANALYSIS

This analysis includes comparisons with published figures for releases in 1963-67, inclusive and 1970. No related information is available for releases in 1968, or 1969.

Tables 71.1.1, 71.2.1, 71.3.1

Considering the combined total of 2,422 releases in Table 71.1.1 on ordinary and minimum parole during 1971, 27.3% or 660 individuals, recidivated during the twelve months under study. Comparative figures for previous years, based on a twelve month time period are:

<u>Year of Release</u>	<u>Total Releases</u>	<u>Total Recidivism</u>	
		<u>No.</u>	<u>%</u>
1971	2,422	660	27.3 ✓
1970	2,671	816	30.6
1967	1,230	381	31.0
1966	1,036	220	21.2
1965	1,022	239	23.4

1 year to total both during & after parole

The table below shows that recidivism during parole, within the one-year study period, increased 2.0% over the same period for ordinary and minimum parole releases during 1970, peaking at 27.0%. This is consistent with the general increase in such recidivism since the study of such releases in 1966.

The table also demonstrates erratic fluctuation in the rate of recidivism after expiry of parole, within the one-year follow-up period, recording a decrease to 0.2% of the total populations at risk released by means of ordinary or minimum parole.

<u>Year of Release</u>	<u>Recidivism During Parole</u>	<u>Recidivism After Expiry</u>
	<u>(%)</u>	<u>(%)</u>
1971	27.0	0.2
1970	25.0	5.6
1967	20.0	11.0
1966	17.2	4.1
1965	19.5	3.7

ANALYSIS (Contd.)

Table 71.2.1 indicates that 26.1% or 596 of the 2,282 individuals released on ordinary parole recidivated during the twelve month study period. 31.0% of the recidivism resulted from parole revocation, while parole forfeiture accounted for 68.6%.

With regard to minimum parole, Table 71.3.1 reveals that 45.7% or 64 of the 140 individuals recidivated during the first twelve months after release. Of the minimum parole recidivist population, 34.4% resulted from revocation of parole, and parole forfeiture occurred in 60.9% of the minimum parole recidivist population.

1.) ORDINARY PAROLE

<u>Year of Release</u>	<u>Total Release</u>	<u>Type of Recidivism</u>							
		<u>Revocation</u>		<u>Forfeiture</u>		<u>After Expiry</u>		<u>Total Recidivism</u>	
		<u>No.</u>	<u>%</u>	<u>No.</u>	<u>%</u>	<u>No.</u>	<u>%</u>	<u>No.</u>	<u>%</u>
1971	2,282	185	31.0	409	68.6	2	0.3	596	100.0
1970	2,518	128	17.4	418	65.5	125	17.1	734	100.0
1967	946	43	35.2	122	53.7	62	27.3	227	100.0
1966	847	37	27.2	84	61.8	15	11.0	136	100.0
1965	720	45	35.4	63	49.6	19	15.0	127	100.0
1964	623	70	34.6	63	31.2	69	34.2	202	100.0
1963	575	48	28.9	45	27.1	73	44.0	166	100.0

ANALYSIS (Contd.)

2.) MINIMUM PAROLE

<u>Year of Release</u>	<u>Total Release</u>	<u>Type of Recidivism</u>							
		<u>Revocation</u>		<u>Forfeiture</u>		<u>After Expiry</u>		<u>Total Recidivism</u>	
		No.	%	No.	%	No.	%	No.	%
1971	140	22	34.4	39	60.9	3	4.7	64	100.0
1970	153	14	17.1	44	53.6	24	29.3	82	100.0
1967	284	20	13.0	62	40.3	72	46.9	154	100.0
1966	189	19	22.6	38	45.2	27	32.2	84	100.0
1965	302	31	27.7	62	55.3	19	17.0	112	100.0

The three tables indicate that recidivism among both ordinary parole and minimum parole releases was relatively evenly distributed between each of the twelve months under study. Table 71.1.1 indicates that for the twelve one-month time spans considered, the peak number of recidivists occurred during the fifth month after release.

In comparison with parallel figures on recidivism for total parole releases in 1970, the most significant changes occurred in relation to increases in the number of revocations during the parole period, for both ordinary and minimum parole, and correspondingly, recidivism after the parole period decreased from 18.3% in 1970 to 0.8% in 1971.

The balance of the tables offer varying representations of the trends identified above.
