Basic Summary Tabulations (20% Sample) Enumeration Areas and Federal Electoral Districts 1986 Census

A third set of detailed socio-economic data from the 1986 Census is now available on computer tape for the provinces, federal electoral districts (1976 representation order) and enumeration areas (the smallest standard census geostatistical area for which data are available). These data were collected from one in five Canadian households. This new information is presented in the form of cross-tabulations, with each table featuring two or three variables.

These tabulations are designed to meet the most commonly expressed needs of census data users who wish to study the characteristics of small areas. The data stored on these computer tapes are more detailed than those presented in census publications. These data can be used with geographic and cartographic computer files - also available from Statistics Canada - in detailed analyses for such purposes as market research and the planning of community services.

See page 2 of today's *Daily* for a list of tables and prices.

Basic Summary Tabulations (20% Sample)

1986 Census

The following tables are available today at the enumeration area level, with totals for federal electoral districts (1976 representation order) and provinces.

These tables contain data extracted from the long questionnaire completed by a 20% sample of households. This set of tables completes the offering of basic summary tabulations from the 1986 Census for this level of geography. Data extracted from the questionnaire completed by all Canadian households were released in November 1987 and other data extracted from the long questionnaire completed by a 20% sample of households were released over the last few weeks.

Basic summary tabulations are available on computer tapes. Because these products have a standard format, they can be offered for the lowest price of all machine-readable data from the 1986 Census. Prices for tapes range from \$305 for the Yukon to \$2,500 for all of Canada. Cost estimates for data for selected subprovincial regions or for diskette or paper copies will be provided upon request.
