INTRODUCTION

This catalogue is your guide to the products and services of Statistics Canada's Agriculture Division and how you can obtain them. In it, you'll find:

- the names and telephone numbers of key people who can answer your questions about agriculture and food data
- a wide range of published and unpublished, custom and electronic data products and services related to agriculture and food
- essential release dates and pricing information
- how to order the Agriculture Division products that interest you.

What Can We Offer You?

Data from Statistics Canada's Agriculture Division are available in a variety of formats, including publications, customized printouts, diskettes, magnetic tapes, CANSIM (Statistics Canada's computerized database), and by telephone or facsimile.

Our information on the agriculture industry can help you:

- monitor the financial performance of farms
- analyze commodity markets
- assess food consumption patterns
- project food production
- determine agriculture industry structure
- analyze farm and rural population trends
- examine characteristics of the farm population
- monitor crop growth and help predict yields.

Who Are We?

The **Census of Agriculture Section** provides information on the detailed structure of the farm sector and the detailed geographic location of agricultural production. It also provides the basis for most agriculture surveys and data series.

Results of the last Census of Agriculture, June 4, 1991, were released on June 4, 1992 and Agriculture - Population Linkage results were released on November 17, 1992 and on November 16, 1993. The next Census of Agriculture will take place on May 14, 1996.

The **Farm Income and Prices Section** produces estimates of farm cash receipts by item, farm expenses by item, depreciation, farm products price index, net farm income, assets and liabilities.

The **Whole Farm Data Projects Section** provides a complete set of physical and financial data at the whole farm level. These data include detailed revenues and expenses, operator and family off-farm income, crop acreages, livestock numbers, capital investment and sales, assets and liabilities by size and type of farm for sub-provincial regions.

The **Crops Section** produces estimates of field crops, horticultural crops, per capita consumption and grain marketing statistics.

The **Livestock and Animal Products Section** produces data on livestock, dairy, poultry and eggs, furs and other animal products.

Spatial Analysis and Geomatics Applications provides information to clients on crop conditions, crop area, land-use change and related agriculture and environmental applications by analyzing satellite and spatial data and conducting research and development.

Data users who need help in designing custom tabulations from the division's databases will find it in the **Research and Analysis Section**. The section also analyzes data at the aggregate and micro-record levels.

The **Systems Co-ordination and Production Section** provides internal computer and survey processing services.

We invite you to call us toll-free at 1-800-465-1991
if you have any questions concerning agriculture data.

WE LOOK FORWARD TO SERVING YOU!

SPECIAL SERVICES

CUSTOM TABULATIONS, ANALYTICAL STUDIES AND SPECIAL SURVEYS

Agriculture Division has a number of customized services which can help you. We can provide you with tables containing only the data you require. Plus, we can do the analysis of the data for you. Or, should you require data that has not yet been collected, we can do a special survey for you. These data can also be combined with other Statistics Canada surveys and custom data extractions from CANSIM.

For more information please contact:

Zoltan Somogyi (613) 951-8718
or
Ray Bollman (613) 951-3747

CUSTOM SERVICES FROM THE CENSUS OF AGRICULTURE

The Census of Agriculture can tailor products to your special requirements at cost, subject to confidentiality constraints. Custom services are available for tabulations, thematic maps and user workshops.

a. Custom Tabulations — allow you to create personalized tables from the Agriculture, the Agriculture-Population and the Historical databases. Customized data are available for census years 1966 to 1991. (Data from 1966 and 1976 are not available for the Agriculture-Population linkage.) Census of Agriculture data and data from the 1991 Agriculture-Population base are now available. In addition, tabulations of entry, exit and the micro-dynamics of structural change are available from the 1966 to 1991 Census of Agriculture Match databases.

b. Thematic Maps — are an effective way to present statistical data visually. Maps made to your specifications are available in black and white, or in colour. Maps, and supporting custom tabulations, can be produced for Census of Agriculture standard geography as well as user-defined areas. Prices and delivery depend on the complexity of each request.

c. Census of Agriculture Workshops — our full or half-day workshops can help new and current clients get the most out of census data. Each workshop is supplemented by take-home materials.

INFOHORT

****NEW****

This Canadian horticultural industry initiative is an on-line system providing access to the most current and accurate market information on horticultural commodities. Users have access to daily and weekly market prices, storage holdings, unloads (domestic and imports), international trade reports and much more. The system is menu driven, making it easy to learn and use. It operates 24 hours a day, 7 days a week. InfoHort is available through StatsCan Online.

For more information about InfoHort please contact the nearest Statistics Canada Regional Reference Centre listed on page 5 or contact:

Zoltan Somogyi (613) 951-8718
or
Lynn St-Germain (613) 951-5304

THE WHOLE FARM DATA BASE

The Whole Farm Data Base (WFDB) provides a set of physical and financial farm data at the whole farm level by compiling data from various surveys and administrative sources. This allows you to obtain detailed farm revenue and expenditure data, sources and level of off-farm income for farm operators and farm families, assets, liabilities and capital investment data and estimates on land use and livestock inventories. All these variables can be disaggregated by farm type, revenue class and subprovincial area.

There are three major data sources currently offered on the WFDB: the Taxation Data Program (TDP); the Farm Financial Survey (FFS); and the Crops and Livestock Surveys. Although the WFDB can be used to produce estimates for selected domains regardless of the revenue level, the base is primarily structured to provide data for farms with reported revenues of \$10,000 and over.

In order to satisfy a variety of user needs, the Whole Farm Data Projects Section offers an assortment of products and services including:

Agricultural Financial Statistics (Cat. No.21-205) is an annual publication featuring a series of statistical tables that use the TDP portion of the WFDB as their source (see page 12 for more information on this publication).

The Extraction System of Agricultural Statistics (ESAS) is a menu-driven software program available to users in a CD-ROM format. Using the WFDB as its source, ESAS allows you to access an extensive series of tables featuring the most commonly requested disaggregated physical and financial farm data. A user's guide and reference manual are included with the purchase of the CD-ROM product.

- Release date: June 1995
- Canada: \$925 - initial subscription, \$495 - annual updates
- US and Foreign orders: \$925US - initial subscription, \$495US - annual updates
- LAN and multiple disc prices are available upon request

Customized tables are another option available to you from the WFDB. At present, these requests can be disseminated in print or on diskette (in ASCII or Lotus file format). Costs for customized WFDB products depend on size and complexity of requests. Data availability is subject to confidentiality constraints.

More information about the Whole Farm Data Base is available in the **Whole Farm Data Base Reference Manual** available **free of charge** from the Agriculture Division by contacting:

Paul Spooner
User Services and Marketing
Whole Farm Data Projects Section
(613) 951-5027

SPATIAL ANALYSIS AND GEOMATICS APPLICATIONS

Agriculture Division's Spatial Analysis and Geomatics Applications program (SAGA) provides a variety of products and services using the tools and methodologies of digital image analysis and geographic information systems. The SAGA program includes operational agricultural and environmental applications, custom mapping, image analysis and geomatics services. These remote sensing and geostatistical products and services are available on a fee-for-services basis.

Agricultural & Environmental Remote Sensing / GIS Applications

The SAGA team has considerable experience and expertise in developing operational remote sensing and integrated geographic information processing applications. The data generated by the programs SAGA is involved with are available to its clients, and in fact, these programs may be extended to meet your special needs. These programs include:

- **The Crop Condition Assessment Program (CCAP)** is a subscription service that provides weekly crop condition reporting for the Prairie provinces based on low-resolution NOAA digital satellite data. This service produces timely,

quantitative and objective crop condition information at the Census Agricultural Region, Rural Municipality and user defined level. The weekly information package includes maps, graphs, tables and visual full-colour images. Currently, subscribers to this program receive their information packages by courier, however, starting in May, 1995, subscribers will have the option to receive their packages electronically.

- **The Potato Area Estimation Program (PAEP)** is capable of providing estimates of the area planted in potatoes in Prince Edward Island and New Brunswick using high-resolution digital data from the Landsat and SPOT satellites. Similar methodologies can be used to estimate areas of other crops such as canola, summerfallow and cereal grains in Western Canada. There are also many related applications that could use the satellite data available from the historical image archives kept by SAGA.

****NEW****

- **The 1991 National Urban Land Information Base (NULIB)** is a joint program with Environment Canada. The program is designed to efficiently and cost-effectively monitor land-cover and land use in Canada's major urban centres using high-resolution digital satellite imagery. The resulting database can be used to calculate land use change statistics, such as rural to urban changes and to measure environmental indicators such as the amount and location of urban green space. The NULIB GIS database is available for individual Census Metropolitan Areas (CMAs). The files can be integrated with other Statistics Canada spatially referenced data including street network files, census of population, socio-economic, agricultural and environmental data sources to produce a powerful spatial urban information database.

Research & Development

Ongoing research and development are an important aspect of the SAGA program. As with the custom mapping and image analysis programs, the results of SAGAs research and development

efforts are often available to its clients. Current projects include:

- statistical early season estimation of Prairie crop yields using NOAA satellite and meteorological data
- land-use and land-use change analysis from high-resolution digital satellite imagery
- geographic information database design and setup
- the use of remote sensing for statistical Area Sampling Frame (ASF) construction
- the use of radar data monitoring for land use and crop classification
- validation of census information
- geostatistical integration of database software/hardware systems

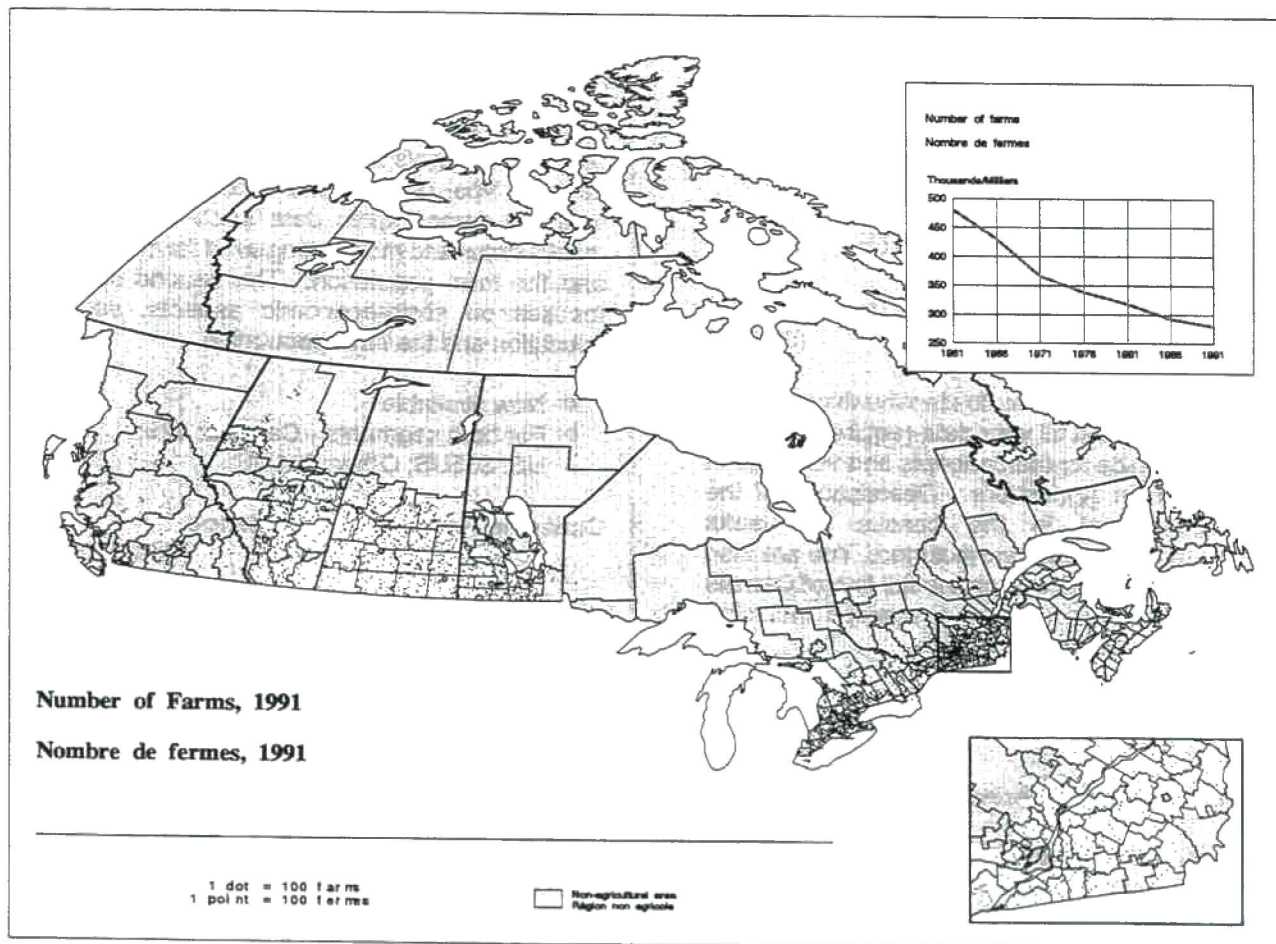

Other Available Services & Applications

- estimation of crop and vegetation area and crop yields by user defined statistical units such as risk areas and management districts
- drought, insect and disease detection and analysis from satellite imagery
- remote sensing/geographic information system integration and custom mapping
- analysis and mapping of land-use classification and change monitoring
- spatial and statistical data integration
- remote sensing consulting and training
- specialized geostatistical research and methodology development

From its extensive work in satellite remote sensing and geographic information systems, SAGA has accumulated a wealth of data and experience — both of which are available to its clients. For further information about these and other special products and services, please contact:

Ken Korporal
Spatial Analysis and
Geomatics Applications
(613) 951-3872

The following map is an example of the capabilities of the Spatial Analysis and Geomatics Applications Program. This map, one of 50 in the publication **Canadian Agriculture at a Glance** (96-3010XPB) and shown here in black and white, is available to SAGAs clients in full-colour format.

PUBLICATIONS

GENERAL

Farming Facts (21-522E)

The 1995 edition of **Farming Facts** highlights major features of the agriculture and food sector.

- Release date: December 22, 1995
- Canada: \$5; US: \$6US; Other: \$7US

CENSUS OF AGRICULTURE

1991 Census of Agriculture Products and Services (92-303)

This catalogue helps you to identify which product or service will best fill your data requirements and serves as a guide for the concepts and variables of the Census of Agriculture. Descriptions of the geography used in the census as useful background information are included. You are also provided complete details on the full line of Census of Agriculture products and services including pricing and ordering information.

- Now available
- No charge

Agricultural Profile Series

This series of 22 publications reveals the data collected from all Canadian farm holdings. Basic counts for provinces and census divisions are in *Part 1* (11 volumes: Canada, 10 provinces). *Part 1* is available in print format or on diskette. Detailed cross-tabulations are provided in print format only in *Part 2* (11 volumes: Canada, 10 provinces).

- Now available
- For individual catalogue numbers and prices, see pages 29 and 30

Census Overview of Canadian Agriculture: 1971-1991 (93-348)

This historical perspective of Canadian agriculture contains census data from 1971 to 1991.

- Now available
- Canada: \$49; US: \$59US; Other: \$69US

Trends and Highlights of Canadian Agriculture and Its People (96-303)

This concise study presents key agricultural and socio-economic variables from the Census of Agriculture and the Census of Population. The first segment highlights selected agricultural data such as farm type, receipts and expenses, as well as selected demographic data such as age, sex, marital status and mother tongue of farm operators and the farm population. The second segment focuses on socio-economic aspects, such as education and the farm population.

- Now available
- For both segments - Canada: \$29; US: \$35US; Other: \$41US

Canadian Agriculture at a Glance (96-3010XPB)

This bilingual book tells the story of Canadian agriculture through a stimulating format of feature articles, figures and maps. It presents current perspectives and historical trends on such subjects as farm people, rural communities, farm finances, crops, livestock, technology and management practices. The content is based on the Census of Agriculture and the Census of Agriculture - Population databases, the Agriculture Division's annual survey program and other data sources. For the education market, a Teacher's Kit (96-3010SPB) is available *free of charge to educators* with the purchase of the book. This colourful presentation is a perfect addition to any collection of agriculture information.

- Now Available
- Canada: \$49; US: \$59US; Other: \$69US
- 30% discount to educational institutions
- FREE Teacher's Kit (96-3010SPB) is

available to educators with the purchase of the book

People in Canadian Agriculture (21-523)

The analysis presented here focuses on people involved in the primary segment of Canadian agriculture. Three topics are discussed: all persons in Canadian agriculture; members of the household of agricultural persons; and the farm as it relates to population variables. Historical and provincial comparisons are provided where possible.

- Now Available
- Canada: \$30; US: \$36US; Other: \$42US

Small Area Tables

This unique source of small area data presents basic counts and totals for all 1991 Census of Agriculture variables at the province, census division and census consolidated subdivision levels (smallest area for which Census of Agriculture data is published), and are available in print or electronic format. Diskettes are available in the C-91 database format developed by Statistics Canada. This format features built-in software that allows users to retrieve, manipulate and output data in formats that can be used with a variety of commercially available software packages such as Lotus 1-2-3, dBASE and Atlas Graphics. Prices vary by province for the print and diskette products, including package discounts. For more information please contact:

Cindy Heffernan
User Requests and Information
Census of Agriculture
(613) 951-5316

See the Census of Agriculture price list on pages 30 and 31 for complete price listings, catalogue numbers and special discount packages available.

FARM INCOME AND PRICES

Farm Cash Receipts and Product Price Index (21-001)

This publication contains cumulative quarterly farm cash receipts for individual crops, livestock and direct program payments for the current and previous year, by province and nationally. Also contained are quarterly indices of prices received by farmers from the sale of farm products, by province and nationally, and sub-indices for major commodity groups at the Canada level. Some analysis and explanatory notes on concepts and methods and data quality are included.

- Release dates: February 22, May 29, August 21, November 24, 1995 and February 22, 1996
- Annual Subscription - Canada: \$62; US: \$75US; Other \$89US
Per Issue - Canada: \$19; US: \$23; Other \$27US
- Available by fax (see **FAX SECTION** page 15)

Agriculture Economic Statistics

Binder - (21-603E)
Updates - (21-603UPE formerly 10-603E)

This publication provides annual estimates of net farm income, farm cash receipts, farm operating expenses and depreciation charges, the index of farm production (1935 - 1985 only), current values of farm capital, farm debt outstanding, the farm product price index, direct program payments, the production account, the balance sheet of the agricultural sector, the cash flow account and wage rates for hired agricultural labour. Data highlights are provided for the most current year. Notes on concepts, methods, and data quality, plus listings of CANSIM databank numbers for each data series, are included with the basic historical data set in the binder.

Subscribers to this publication will receive **updates** twice a year. These updates contain the most current data as well as revisions of previously

published data.

- Release dates for updates: July 12, 1995 and January 5, 1996
- Binder - Canada: \$80; US\$96US; Other: \$112US
Updates: Annual Subscription - Canada: \$50; US: \$60US; Other: \$70US
Updates: Per Issue: Canada: \$25; US: \$30US; Other: \$35US
- Available by fax (see **FAX SECTION** page 15)

WHOLE FARM DATA PROJECTS

Agricultural Financial Statistics - *Detailed revenues and expenses, off-farm income of operators and farm families, by type of farm and revenue class* (21-205)

Detailed itemization of operating revenues and expenses by province, type of farm and economic class are provided in this publication. Sources and levels of off-farm income for unincorporated operators and farm families are featured as well as distributional tables on farm and off-farm income. Data highlights, concepts, methods and a glossary are also included.

Data from Revenue Canada, Taxation returns of unincorporated and incorporated farms provide the statistical basis for this publication.

- Release date: May 5, 1995

CROPS

Field Crop Reporting Series (22-002)

Eight reports on stocks of grain and crop area, yield, and production are released at strategic times during the crop year.

Three reports provide data on stocks of grain for farm and commercial positions for Canada and the provinces (Reports No. 1, 3 and 6).

Two reports provide data on seeded area. Report No. 2, in April, contains the seeding intentions of producers, while the June report (Report No. 4) contains the actual seeded areas of field crops.

Yields and levels of production by province are estimated before the harvest (Report No. 5), during the harvest (Report No. 7), and after the harvest (Report No. 8).

- 1995 release dates are: Report No. 1 February 2; Report No. 2 April 28; Report No. 3 May 12; Report No. 4 June 30; Report No. 5 August 24; Report No. 6 September 7; Report No. 7 October 6; and Report No. 8 December 7
- Annual Subscription - Canada: \$85; US: \$102US; Other: \$119US
Per Issue - Canada: \$15; US: \$18US; Other: \$21US
- Available by fax (see **FAX SECTION** page 15)

Cereals and Oilseeds Review (22-007)

Analysts, grain traders and members of the agribusiness and farm community are interested in this current source of grain marketing data. Its focus is restricted to the major grains produced in Canada: wheat, durum wheat, barley, oats, corn, rye, flaxseed, canola-rape seed and soybeans, with an emphasis on supply-disposition analysis, trade, price and industrial processing data.

- Release dates: February 28, March 31, April 28, May 31, June 30, July 31, August 31, September 29, October 31, November 30, December 29, 1995 and January 31, February 29, 1996
- Annual Subscription - Canada: \$144; US: \$173US; Other: \$202US
Per Issue - Canada: \$15; US: \$18US; Other: \$21US

Grain Trade of Canada (22-201)

This annual report provides a summary of key data series relating to the production, marketing, handling, and transportation of major Canadian grains from the farm to domestic and export channels. It is prepared in collaboration with the

Economics and Statistics Division of the Canadian Grain Commission.

- Release date: May 31, 1995
- Canada: \$42; US: \$51US; Other: \$59US

Fruit and Vegetable Production (22-003)

This publication provides an overview of the Canadian fruit and vegetable production sector. Estimates of the annual commercial production of apples by variety are included. The annual commercial production and value of the major tree fruits and berries and grapes are also available. Annual estimates of the area, yield, production and value of the major commercially grown vegetables are published. For the mushroom growing industry, estimates of area, production, sales, investments and labour costs and employment are available once yearly. Statistics on the tobacco growing sector are published twice yearly. Three times a year, estimates of the area, yield and production of potatoes are published. The value of potato production is published once yearly.

- Release dates: February 21, June 15, September 15 and December 15, 1995 and February 23, 1996
- Annual Subscription: Canada: \$115; US: \$138US; Other: \$161US
Per Issue: Canada: \$29; US: \$35US
Other: \$41US

Greenhouse Industry (22-202)

This annual publication provides an overview of the Canadian greenhouse industry. Included are annual estimates of the total area under glass and plastic, months of operation and total sales. Estimates of employment, labour costs, investments, purchases of plant materials and heating fuel costs are also available. Information on the value of sales of greenhouse vegetables, flowers and ornamental plants is also published, as well as the production of flowers by variety. The publication includes analysis of the internal structure of the greenhouse industry based on total sales and type of flowers or plants produced.

Information is also provided on the value of sales through various channels of distribution.

- Release date: May 15, 1995
- Canada: \$33; US: \$40US; Other: \$47US

Survey of the Canadian Nursery Trades Industry (22-203)

Estimates of total land used for growing nursery stock or sod, labour costs and employment, purchases of plant materials and sod are provided in this annual review of the nursery trade industry. Sales of nursery stock through nine different distribution channels are available. Plus, an analysis of the internal structure of the nursery stock and sod growing sector is included.

- Release date: May 15, 1995
- Canada: \$26; US: \$32US; Other: \$37US

Potato Historical Series - Binder (22-008)

Estimates of area planted, area harvested, total production, marketed production, farm price and farm value by province for 1891 to date are presented in this binder.

For updates to this binder, see the **Statistical Bulletin: Canadian Potato Production (22-008U)**. These bulletins summarize potato area, yield, and production estimates by province.

- Canada: \$90; US: \$110US; Other: \$130US

Statistical Bulletin: Canadian Potato Production-Updates (22-008U)

Updates to the **Potato Historical Series-Binder (22-008)** are provided in the form of statistical bulletins which summarize potato area, yield, and production estimates by province.

- Release dates: July 14, November 17, 1995 and January 19, 1996
- Annual Subscription - Canada: \$21; US: \$21US; Other: \$21US

Statistical Bulletin: Production and Value of Honey and Maple Products (23-221)

This bulletin summarizes the production and value of honey and maple products in Canada by province.

- Release date: November 14, 1995
- Canada: \$10; US: \$12US; Other: \$14US

LIVESTOCK

Livestock Statistics

Binder - (23-6030XPE)
Updates - (23-6030UPE formerly 10-600E)

This publication presents estimates on the three major livestock categories: cattle and calves; hogs; and sheep and lambs. The data cover inventories as well as supply and disposition balance sheets for cattle and hogs. Also included are data on the production and value of wool and furs. In addition, data are presented on trade, prices, per capita consumption and stocks for selected livestock and livestock products. Notes on the concepts, methods and data quality are included with the basic historical data set (1976 to date). Updates, released four times per year, include new and revised estimates for the various series. Data highlights for the major series are also included in two of the updates.

Subscribers to this publication are also eligible for the **Fax Service** for Selected Livestock Statistics Tables listed on page 15.

- Release dates for the updates: March 3, April 28, October 27, 1995 and March 4, 1996
- Binder - Canada: \$90; US: \$108US; Other \$126US
- Updates - Canada: \$144; US: \$173US; Other \$202US

The Dairy Review (23-001)

This statistical summary of the dairy situation in Canada and the provinces, includes farm sales of milk for fluid and manufacturing purposes; cash receipts from farm sales; and production and stocks of creamery butter, cheddar cheese and other dairy products and by-products. Data are reported by all dairies, dairy factories, and major cold storage warehouses in Canada. Notes on data highlights, concepts, methods and data quality are also included.

- Release dates: February 13, March 13, April 13, May 12, June 13, July 13, August 14, September 12, October 13, November 14, December 13, 1995 and January 15, February 13, 1996
- Annual Subscription: Canada: \$138; US: \$166US; Other: \$194US
- Per Issue: Canada: \$14; US: \$17US; Other: \$20US

Production of Poultry and Eggs (23-202)

This annual publication assembles charts and tables which present current and historical data on the turkey, chicken, stewing hen, and egg industries in Canada. The topics covered include annual supply, disposition, and per capita disappearance of poultry meat and eggs at the national level. Production and value are given for each commodity at the provincial level. Data highlights, concepts, methods, and data quality are also included.

- Release date: May 28, 1995
- Canada: \$36; US: \$44US; Other: \$51US

Grains and Oilseeds: Consumption by Livestock and Poultry, Canada & Provinces, 1993 (23-212E)

This report contains tables relating to the consumption of grains and oilseeds by subclass of livestock and class of poultry by province.

- Issued annually
- Canada: \$50; US: \$50US; Other: \$50US

FOOD

Apparent Per Capita Food Consumption in Canada, Part I (32-229)

Supply, disposition, and per capita consumption data are presented in Part I for the following food groups: cereals, sugars and syrups, pulses and nuts, beverages, dairy products, poultry, eggs and meats. Per capita consumption is available on both a retail weight and fresh equivalent basis per day and per year. The 1988 issue also shows you how to calculate the red meat disappearance. Pork per capita consumption on a retail weight basis from 1960 to 1988 is also included. In addition, revised estimates of the meat equivalent of animal output for 1981 to 1988 are provided.

- Release date: June 2, 1995
- Canada: \$32; US: \$39US; Other: \$45US

Apparent Per Capita Food Consumption in Canada, Part II (32-230)

Part II contains supply, disposition, and per capita consumption data for the following food groups: oils and fats, fruits, vegetables, potatoes, and fish. Per capita consumption is available on both a retail weight and fresh equivalent basis per day and per year.

- Release date: December 8, 1995
- Canada: \$32; US: \$39US; Other: \$45US

Stocks of Food Commodities in Cold Storage and Other Warehouses (32-217)

This publication provides summary data on stocks of dairy products, poultry, and red meats for Canada and provinces (except Newfoundland).

- Release date: April 28, 1995
- Canada: \$36; US: \$44US; Other: \$51US

Statistical Bulletin: Production of Eggs (23-003)

This statistical bulletin summarizes the production of eggs in Canada by province.

- Release dates: January 12, February 10, March 10, April 10, May 10, June 9, July 10, August 10, September 11, October 11, November 10 and December 11, 1995, January 11 and February 9, 1996.
- Canada: \$110; US \$134US; Other: \$157US

FAX SERVICES

For your convenience, we also offer several fax services that provide you with quick and easy access to our data. An order form for these services is located at the back of this catalogue.

Farm Cash Receipts Fax Service (21-0010XFB)

The data on farm cash receipts from publication 21-001 *Farm Cash Receipts and Farm Product Price Index* are available by FAX quarterly.

- Canada: \$90; US: \$110US;
Other: \$125US

Farm Product Price Index Fax Service (62-0030XFB)

The Farm Product Price Index data from publication 21-001 *Farm Cash Receipts and Farm Product Price Index* are available by FAX monthly.

- Canada: \$180; US: \$215US;
Other: \$250US

Agricultural Economic Statistics Fax Service (21-6030UFE)

The updates to the publication 21-603 available by Fax.

Part A - Annual Farm Income, Receipts, Expenses, Direct Payments

- Canada: \$115; US: \$140US;
Other: \$160US

Part B - Annual Agricultural Debt, Capital Value and Balance Sheet

- Canada: \$100; US: 120US;
Other: \$140US

Canola Crush Fax Service (22F0001XFB)

A monthly fax service of a reworked table of data eventually published in **Cereals and Oilseeds Review (22-007)** providing beginning stocks, total crushing, and oil and meal produced. The service is available by annual subscription.

- Canada: \$50; US: \$50US; Other: \$70US

Field Crop Reporting Series Fax Service (22-0020XFB)

Eight reports per year containing data on area, yield, production and stocks of field crops. This service contains the complete information published in **Field Crop Reporting Series (22-002)**. Delivery is guaranteed on the day of release.

- Canada: \$200; US: \$240US;
Other: \$280US

Field Crop Reporting Series Fax Service from The Daily (11F0004XFE)

Eight reports per year containing data on area, yield, production and stocks of field crops. This service contains the summary data published in *The Daily* and are included as part of the STATFAX service.

- Canada: \$55; US: \$55US; Other: \$55US

Fax Service for Selected Livestock Statistics Tables (23-6030UFE)

A FAX service providing livestock statistics on the day of release is available to subscribers of **Livestock Statistics (23-603)**. Selected tables from the Livestock Statistics binder including data for the current period and three previous periods are provided. Standard inventories of cattle, calves, pigs, sheep and lambs as well as pigs born, sows farrowed and farrowing intentions are

available for Canada, East/West regions and the provinces. Supply-disposition balance sheets for cattle, calves and pigs are also included.

- Release dates: March 3, April 28, August 31 and October 27, 1995
- Annual subscription - Canada \$75;
US: \$90US; Other: \$105US

VISTA NEWSLETTER

VISTA is a semi-annual newsletter for users of agriculture statistics. Each issue contains several short articles highlighting statistical insights on themes relating to agriculture, food and rural issues. In addition, there are current indicators of agricultural activity, a list of subject matter contacts and a schedule of upcoming statistical releases.

VISTA is distributed FREE to purchasers of Agriculture Division products and services. Others may subscribe to the semi-annual newsletter by contacting the editor:

Rick Burroughs
Tel: (613) 951-2890
FAX: (613) 951-3868

- \$10Cdn for Canadian and international subscribers
- FREE via Internet (talon.statcan.ca)

AGRICULTURE PRODUCTS FOR EDUCATORS

The Agriculture Division has developed a number of products which are suitable for the classroom setting and can be used in a variety of subject areas including social studies, geography, science and history. They combine data, graphics and visuals to give students an interesting perspective on Canadian agriculture.

Census of Agriculture Interactive Computer Quiz

A popular learning experience for junior and secondary students, the Census of Agriculture computer quiz will challenge and entertain students while testing their knowledge of Canadian farming. Questions are based on the 1991 Census and on results from previous Censuses of Agriculture.

- Canada: \$5; US: \$6US; Other: \$7US
- Available on 3.5-inch diskette for IBM or compatible computers (286 or higher)
- ATI or Paradise graphics board required.
- Contact Cindy Heffernan at (613) 951-5316

1991 Census Results Teacher's Kit

This **free** kit contains teacher-ready classroom activities. Included are one junior and one senior level activity, based on the **Census of Agriculture**, which provide students with interesting learning experiences about Canadian agriculture and Canada's ever-changing agri-business. These innovative, reusable classroom materials create an awareness and understanding of the importance of agriculture. Students will learn how to use and analyze Census of Agriculture data and become familiar with identifying trends. All activities have been reviewed and classroom tested by professional educators.

To order, contact:

Canadian Agriculture at a Glance

(96-3010XPB)

This bilingual book tells the story of Canadian agriculture through a stimulating format of feature articles, figures and maps. It presents current perspectives and historical trends on such subjects as farm people, rural communities, farm finances, crops, livestock, technology and management practices. The content is based on the Census of Agriculture and the Census of Agriculture - Population databases, the Agriculture Division's annual survey program and other data sources. For the education market, **a Teacher's Kit (96-3010SPB) is available free of charge to educators with the purchase of the book.** This colourful presentation is a perfect addition to any collection of agriculture information.

- Now Available
- Canada: \$49; US: \$59US; Other: \$69US
- 30% discount to educational institutions
- **FREE Teacher's Kit (96-3010SPB) is available to educators with the purchase of the book**

Trends and Highlights of Canadian Agriculture and Its People

(96-303)

This publication features highlights of key data from the 1991 Census of Agriculture and the Census of Population, in two segments. Supplemented by tables and graphs, it discusses emerging trends in the agricultural sector and the people involved in Canadian agriculture.

The first segment highlights selected agricultural data such as farm type, receipts and expenses, as

well as age, sex, marital status, and mother tongue of farm operators and the farm population. The second segment focuses on socio-economic aspects such as education and the farm population. Secondary school and up.

- Now available
- For both segments -Canada: \$29; US: \$35US; Other: \$41US
- 30% discount to educational institutions

Farming Facts (21-522E)

All grade levels will be interested in using the series of graphs and visuals in this informative handbook which features a wide variety of Canadian agricultural activities — from fruit and vegetable production to farm machinery and equipment.

- Available: December 22, 1995
- Canada: \$5; US: \$6US; Other: \$7US
- Limited quantities available

Crop Condition Assessment Program (CCAP) for Educational Institutions

The Spatial Analysis and Geomatics Applications program (SAGA) provides satellite-based information for monitoring crop growing conditions in Manitoba, Saskatchewan and Alberta on a weekly basis throughout the growing season from its Crop Condition Assessment Program (CCAP).

A complete series of non-current CCAP products is available to educational institutions. The products include standard maps, graphs, tabular data and one colour image product for each week of the growing season (15 packages).

- Secondary school and up
- Canada: \$500; US: \$500US; Other: \$500US
- Contact Ken Korporal (613) 951-3872

E-STAT

E-STAT is a computer-aided learning package developed for secondary school teachers and students, following extensive in-school testing. It allows users to retrieve and manipulate current

statistical information, then display the results as maps, graphs or worksheets.

The package includes a database and software mounted on a CD-ROM and is available for both MS-DOS and MAC based systems. The database contains more than 300,000 time series that describe the social and economic conditions of Canada and its citizens, including 16,000 time series related to the agricultural sector. Supporting documentation is provided in a teachers' resource (including lesson plans developed by professional educators), a tutorial and a quick reference card.

For further information on E-STAT, please contact the Statistics Canada Regional Reference Centre nearest you (see page 5), or contact:

Ruth Kelly
E-STAT Project Manager
Tel: (613) 951-1130
Fax: (613) 951-4513

For more information on these classroom products call us toll free at 1-800-465-1991 or contact the Statistics Canada Regional Reference Centre nearest you (see page 5).

AGRICULTURE WORKING PAPERS SERIES

The Agriculture Division publishes working papers on research, analytical results, statistical techniques, methods and concepts.

These papers can be ordered for a cost, or may be accessed free of charge via Internet.

No.1 (21-6010MPE01000)
A Description of Theil's RMPSE Method in Agricultural Statistical Forecasts (1980) - Stuart Pursey

- All Countries: \$5.00Cdn

No. 3 (21-6010MPE03000)
A Review of the Livestock Estimating Project with Recommendations for the Future (1981) - Bernard Rosien and Elizabeth Leckie

- All Countries: \$5.00Cdn

No. 4 (21-6010MPE04000)
An Overview of the Canadian Oilseed Industry (1984) - Glenn Lennox

- All Countries: \$5.00Cdn

No. 5 (21-6010MPE05000)
Preliminary Analysis of the Contribution of Direct Government Payments to Realized Net Farm Income (1984) - Lambert Gauthier

No. 23 (21-6010MPE23000)
Potatoes: A Comparison of Canada/USA Structure - Glenn Zepp, Charles Plummer, Barbara McLaughlin

- All Countries: \$5.00Cdn

No. 24 (21-6010MPE24000)
Farm Structure Data: A U.S.-Canadian Comparative Review - Victor J. Oliveira, Leslie A. Whitener, Ray Bollman

- All Countries: \$5.00Cdn

No. 25 (21-6010MPE25000)
Grain Marketing Statistics Statistical Methods Working Paper Version 2 - Karen Gray

- All Countries: \$10.00Cdn

No. 26 (21-6010MPE26000)
Farm Business Performance: Estimates from the Whole Farm Database - W. Steven Danford

- All Countries: \$5.00Cdn

No. 27 (21-6010MPE27000)
An Attempt to Measure Rural Tourism Employment - Brian Biggs

- All Countries: \$5.00Cdn

ELECTRONIC PRODUCTS AND SERVICES

EXTRACTION SYSTEM OF AGRICULTURE STATISTICS

The **Extraction System of Agricultural Statistics (ESAS)** is a menu-driven software program available to users in a CD-ROM format. Using the Whole Farm Data Base as its source, ESAS allows you to access an extensive series of tables featuring the most commonly requested disaggregated physical and financial farm data. A user's guide and reference manual are included with the purchase of the CD-ROM product.

- Release date: June 1995
- Canada: \$925 - initial subscription, \$495 - annual updates
- US and Foreign orders: \$925US - initial subscription, \$495US - annual updates
- LAN and multiple disc prices are available upon request
- See page 7 for more information on the Whole Farm Data Base and the available products and services

INFOHORT

****NEW ****

This Canadian horticultural industry initiative is an on-line system providing access to the most current and accurate market information on horticultural commodities. Users have access to daily and weekly market prices, storage holdings, unloads (domestic and imports), international trade reports and much more. The system is menu driven, making it easy to learn and use. It operates 24 hours a day, 7 days a week. InfoHort is available through StatsCan Online.

For more information about InfoHort please contact the Statistics Canada Regional Reference Centre nearest you (see page 5), or contact:

Zoltan Somogyi (613) 951-8718
or
Lynn St-Germain (613) 951-5304

CANSIM TIME SERIES DATA BASE AVAILABILITY

CANSIM is Statistics Canada's computerized data base network and information retrieval service. In total the CANSIM Time Series Data Base contains over 600,000 time series collected from subject matter sources throughout Statistics Canada and from outside sources such as the Bank of Canada. Currently 16,000 time series from Agriculture Division are on CANSIM.

On-Line Access to CANSIM

Complete or subsets of the CANSIM Time Series Data Base are available to the private and public sectors from various commercial service bureaus under license to Statistics Canada.

CANSIM University Base

The entire CANSIM University Time Series Database is available to university and college subscribers via Internet delivery from a university

distributor. Use of the database is restricted to educational institutions for the purposes of teaching and academic research. Most of the 16,000 agriculture time series are also available through the University Base Internet service.

StatCan: CANSIM Disc (CD-ROM)

The StatCan: CANSIM Disc provides a compact cost-effective means of accessing the more than 600,000 CANSIM time series, including the 16,000 agriculture series available from other CANSIM products.

- Canada: \$1,995 for an annual (one copy) subscription
- Canada: \$2,995 for a semi-annual subscription
- 50% discount to educational institutions and public libraries

More information about CANSIM products and services can be obtained from any Statistics Canada Regional Reference Centre listed on page 5.

E-STAT

E-STAT is a computer-aided learning package developed for secondary school teachers and students, following extensive in-school testing. It allows users to retrieve and manipulate current statistical information, then display the results as maps, graphs or worksheets.

The package includes a database and software mounted on a CD-ROM and is available for both MS-DOS and MAC based systems. The database contains more than 300,000 time series that describe the social and economic conditions of Canada and its citizens, including 16,000 time series related to the agricultural sector. Supporting documentation is provided in a teachers' resource (including lesson plans developed by professional educators), a tutorial and a quick reference card.

Fax: (613) 951-4513

TRADE DATABASES

Trade Information Enquiry and Retrieval System

The Trade Information Enquiry and Retrieval System (TIERS) is a data and software package designed to expedite the recovery of Canadian trade information on a microcomputer. With data on over 16,000 import and export commodities for 200 countries, an important commodity category such as agricultural goods is well represented. The system's user-friendly menu includes: Harmonized System descriptions; quantity, values, province, year, country and U.S. State code variables; and flexibility for output media.

TIERS also offers up-to-date monthly merchandise trade data from 1988; the availability of subsets of data; screen editing and ranking functions; aggregation functions; and the capacity for multi-user or LAN access.

World Trade Database

Like TIERS, the World Trade Database contains a significant number of commodities which are the result of agricultural activity. The World Trade Database is a matrix of international trade flows created from data reported by member countries of the United Nations Statistical Office and broken down by partner country and commodity. Countries are classified according to the Standard Classification of Customs areas and territories, commodities according to the Standard International Trade Classification (Revision 2) and industries according to the 1980 Canadian Standard Industrial Classification. The data are annual and the records currently extend over the period 1970 to 1992.

The database enables users to calculate market shares of anyone in any market defined in terms of geography or commodity; perform standard "constant" market share calculations as a means to measure countries' penetration in selected markets; compare the pace of change in the country and commodity structure of trade over time between different trading nations.

Information from the World Trade Database is available on tape, diskette, or computer printout. The cost of each individual request is based on volume and complexity, with each tabulation starting as low as \$130.

The World Trade Database is also available on CD-ROM, for the years 1980-1992. The CD-ROM is \$3,500, subject to licensing agreements, with a 50% discount to educational institutions.

ENVIRONMENTAL INFORMATION SYSTEM

The Environmental Information System contains a wide variety of Statistics Canada socio-economic data series commonly used in analysis of environmental issues. This information can be restructured to suit specific needs of the environmental researcher or consultant. To date, the system has been used by researchers to estimate pollution emission levels; analyze pollutants from agriculture; gauge population pressures on ecosystems; assess land use change; estimate acid rain impacts; and to help estimate soil erosion.

A number of special geographic units are available, including river basins, ecological zones, soil zones, and wetland regions. For example, clients have been provided with socio-economic data tabulated for acid rain deposition zones, endangered species habitats, air pollution monitoring areas, and forest regions, among others.

Over 1,000 demographic, agriculture and manufacturing variables collected by Statistics Canada are maintained on the information system. Examples of these data include population and population change; dwelling characteristics; household facilities; agricultural land uses; agricultural cropping practices, fertilizer and pesticide use; industrial characteristics and activities.

GEOGRAPHY PRODUCTS & SERVICES

The Geography Division maintains a spatially referenced geographic database in support of the Censuses of Population and Agriculture, the Standard Geographical Classification and other Statistics Canada programs. The division also develops geographical concepts, delineates geographic areas, produces maps and other published reference materials, produces files on magnetic tape and diskette, and offers a variety of services.

REFERENCE MAPS: Four series of reference maps are available: Enumeration Area (EA) Maps; Census Division (CD) and Census Subdivision

(CSD) Maps; Census Metropolitan Area (CMA), Census Agglomeration (CA) and Census Tract (CT) Maps; and Federal Electoral District (FED) Maps.

PUBLICATIONS: A variety of publications are available including: the 1991 Population and Dwelling Counts Series; the Enumeration Area Reference Lists series; and the Equivalent Enumeration Areas, 1991 and 1986 (Cat. No. 92-318E). Also available is the Geography Guide Book (Cat. No. 92-310E) which explains the applications of most of Statistics Canada's geographic areas and their hierarchies. Plus, the 1991 Census Geography/Historical Comparison (Cat. No. 92-311E) will assist you in understanding the various changes that have occurred to census geographic areas.

ELECTRONIC PRODUCTS:

GEOGRAPHIC ATTRIBUTE FILE (GAF): This product is based on the enumeration area (EA) and provides the x,y coordinates for each EA representative point plus 1991 population and private occupied dwelling counts.

GEOREF: This is a user-friendly software and data product based on the enumeration area (EA) and links EAs to higher levels of geographic areas. Included are 1991 population and dwelling counts, selected land areas and the EA representative point ("centroid").

DIGITAL BOUNDARY FILES (DBF): These files comprise a library of digital geographic boundaries for most levels of geography from the enumeration area up to the province and territory.

DIGITAL CARTOGRAPHIC FILES (DCF): These files are digital geographic boundary files with shoreline added for thematic mapping and display.

POSTAL CODE CONVERSION FILE (PCCF): This computer file links the six character postal code with standard 1991 Census geographical areas.

PLACE NAME MASTER FILE (PNMF): This is a computer file which provides population and dwelling counts for census subdivisions and unincorporated places linked to enumeration areas.

1986-1991 EA CORRESPONDENCE FILE: This is a computer file containing the relationship of the 1986 enumeration area structure to the 1991 enumeration area structure.

COMPLETE ON-LINE GUIDE TO GEOGRAPHY (COGG): This is an interactive hypertext document that provides quick and easy access to concepts related to census geography.

For further information concerning these and other Geography products and services contact the Statistics Canada Regional Reference Centre nearest you (see page 5).

By Phone: In Canada and the U.S., call toll-free
1-800-267-6677 or call (613) 951-7277

By Fax: (613) 951-1584

Note: *Phone and fax orders will be treated as originals. Please do not send written confirmation.*

From a Regional Reference Centre: Contact the centre nearest to you (see page 5).

Publications are also available through authorized agents, bookstores and selected libraries.

Electronic Products & Special Services

To order an electronic product or a special service, please refer to the contact person(s) listed in the catalogue description of that product or service.

Fax Services

To order any of the Fax Services listed on pages 15 and 16, complete and return the Agriculture Division Fax Subscription Service form at the back of this catalogue or call (613) 951-3169 or toll-free at 1-800-465-1991.

Payment Information:

Cheques and money orders: Please make cheques and money orders payable to the *Receiver General for Canada - Publications*.

Purchase orders: Purchase orders must be accompanied by an authorized signature.

Credit cards: VISA and MasterCard orders are accepted with card number, expiry date and signature.

Canadian clients: Please add 7% GST to all listed prices.

Clients outside Canada: Please pay in U.S. funds drawn on a U.S. bank.

1995 DATA RELEASES

All data are officially released in Statistics Canada's *THE DAILY*. This schedule shows data release dates and publication dates for 1995 and early 1996. *Copies of publications are usually printed within 2 to 4 weeks of the data release date.*
