

Know before you go!

# Flying a drone for fun?

When you fly a drone, you're a pilot.

## Understand the rules and find out where it's safe to fly.

If your drone weighs **250 grams or more**, you must:

- ✓ register it and mark it with its registration number
- ✓ pass an online exam
- ✓ get a drone pilot certificate

If your drone weighs **less than 250 grams**, you don't need to register it or get a pilot certificate, but you must fly safely and legally.

### Always:

- ✓ use good judgement and watch for hazards
- ✓ fly your drone in a way that keeps everyone safe, including aircraft in the air and people on the ground
- ✓ follow all privacy and trespassing laws

All drone pilots need special permission to fly any drone at an advertised event.
